EPA Reg. No. 241-285

**FOR USE IN WHEAT, BARLEY AND SUNFLOWER**

**(Expires December 31, 2001)**

### **OILSEED RAPE (CANOLA) FOLLOW CROPS**

OBSERVE ALL PRECAUTIONARY STATEMENTS AND LIMITATIONS ON THE ASSERT LEAFLET LABEL AND ON TANK MIX PARTNER LABELS. FOLLOW THE MOST RESTRICTIVE USE PRECAUTIONS OR DIRECTIONS FOR APPLICATION THAT APPEAR ON ANY PRODUCT LABEL.

#### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **DO NOT** apply this product through any type of irrigation system.

This label must be in the possession of the user at the time of herbicide application.

#### **CANOLA FOLLOW CROP**

Imidazolinone tolerant varieties of canola, such as Pioneer 45A71 and Pioneer 46A72, may be planted as a rotational crop the season after an application of ASSERT herbicide at label rates on wheat, barley and sunflowers.

Non-imidazolinone tolerant canola may be planted as a rotational crop the season after an application of ASSERT herbicide at the 1 pint rate on wheat, barley, and sunflowers in the counties of Pembina, Cavalier, Ramsey, Walsh, Towner and Rolette in North Dakota and the counties of Kittson, Marshall, Roseau, Pennington, and Red Lake in Minnesota.

The following rotational crops may be planted the season after applying ASSERT at recommended rates in wheat, barley, and sunflowers:

Barley	Corn	Edible Beans	Safflower
Soybeans	Sunflower	Wheat	

For other follow crops, follow instructions on the ASSERT leaflet label.

If ASSERT is used on a field treated during the same year with Ally<sup>1</sup>, Amber<sup>2</sup>, Canvas<sup>1</sup>, Express<sup>1</sup>, Finesse<sup>1</sup>, Glean<sup>1</sup>, Harmony<sup>1</sup> Extra or Peak<sup>2</sup>, follow the most restrictive precautions, directions and recropping/rotation limitations that appear on the respective product labels.

Excessive moisture, drought and/or cold temperatures may affect the performance of ASSERT as well as the residual effect on rotational crops. **DO NOT** plant rotational crops in spray overlap areas, as follow crop injury may occur. The end user assumes all risks and consequences resulting from sprayer overlaps from ground and aerial applications.
