LIST OF CHANGES TO THE SCEPTER® HERBICIDE LABEL

1. The USE AREA map on page 11 now delineates a Northern vs. Southern Use Area.
2. The USE RATES section on page 12 now requires that all SCEPTER treatments in the Northern Use Area be applied prior to July 1.
3. The APPLICATION INSTRUCTIONS (Preplant Incorporated) section on page 12 has been shortened by deleting the "Note" at the end of the section regarding single pass incorporation.
4. The following changes have been made to the ROTATIONAL CROP RESTRICTIONS section on page 27:
 - a. "Small Grains" (already approved at 4 months) has been subdivided into "wheat" at 4 months and "barley" and "oats" at 11 months.
 - b. "Corn" has been changed to "Field Corn".
 - c. Rotation to corn, wheat, barley, and oats has been subjected to a rate and method of application restriction for the Northern Use Area.
 - d. A rainfall restriction has been added for corn, wheat, barley, and oats in the Northern Use Area and for corn only in the Southern Use Area.
