SCEPTER[®]
herbicide

page 1 of 1
**Supplemental
Labeling**

EPA Reg. No. 241-289

**FOR USE IN SOYBEANS
THIS LABEL EXPIRES DECEMBER 31, 1998**

REVISED WHEAT ROTATIONAL INTERVAL

OBSERVE ALL PRECAUTIONARY STATEMENTS AND LIMITATIONS IN THE SCEPTER LABEL BEFORE USING. SEE THE SCEPTER LABEL FOR PRECAUTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, APPLICATION INFORMATION, WEEDS CONTROLLED, USE AREA, OTHER ROTATIONAL CROP RESTRICTIONS AND USES WITH OTHER PRODUCTS.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **DO NOT** apply this product through any type of irrigation system. This label must be in the possession of the user at the time of herbicide application.

ROTATIONAL CROP RESTRICTIONS

In USE REGIONS 1 and 2 east of Interstate Highway 35, wheat may be planted 3 months following a soil application of SCEPTER at a rate up to 2/3 pint per acre or a postemergence application up to 1/3 pint per acre.

Use of SCEPTER herbicide in accordance with label directions is expected to result in normal growth of rotational crops in most situations; however, various environmental and agronomic factors make it impossible to eliminate all risk associated with the use of SCEPTER and, therefore, rotational crop injury is always possible.

ACCEPTED
~~with COMMENTS~~
In EPA Letter Dated
NOV 13 1996

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.
