

EPA Reg. No. 241-299

**ARSENAL HERBICIDE APPLICATORS CONCENTRATE
PLUS ACCORD¹ HERBICIDE TANK MIXTURE
FOR RELEASE OF LOBLOLLY PINE (*Pinus taeda*) FROM
WOODY VEGETATION WHERE PINES HAVE BEEN
ESTABLISHED FOR MORE THAN ONE YEAR**

**OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE
ARSENAL HERBICIDE APPLICATORS CONCENTRATE AND
ACCORD LABELS BEFORE USING. ALWAYS FOLLOW THE
MORE RESTRICTIVE LABEL.**

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Apply 12 fluid ounces of ARSENAL herbicide Applicators Concentrate plus 16 fluid ounces of Accord per acre in broadcast applications using helicopter or ground application equipment for suppression of labeled woody vegetation and release of loblolly pine seedlings. Refer to mixing and application instructions on the ARSENAL Applicators Concentrate leaflet label for proper spray volumes.

Apply ARSENAL Applicators Concentrate spray solutions in late summer or fall but before leaves begin to drop on deciduous species. DO NOT make applications during periods of active loblolly pine height growth. To minimize possibility of height growth suppression to the loblolly pine, do not apply ARSENAL Applicators Concentrate plus Accord prior to July 15 or when loblolly pine seedlings are under stress from diseases, animal or winter injury, planting shock, or other causes.

This label must be in the possession of the user at time of herbicide application.
