Dr. Mark W. Gately  
American Cyanamid Company  
Agricultural Research Division  
P.O. Box 410  
Parsippany, NJ 07054-0410

Dear Mr. Gately:

Reference is made to your letter of 5/29/92 regarding the registration of the pesticide, *1,1-dimethyl-3-(4-chlorophenyl)urea* (DCP), for use as a herbicide. The registration of this pesticide is being processed through the registration process. The registration of this pesticide is being processed through the registration process. The registration of this pesticide is being processed through the registration process.

The results referred to above are the results of the testing conducted with the pesticide under the conditions specified in the registration application. The results of the testing conducted are acceptable. Please advise me if you have any questions or if you need any further information. A copy of your letter, dated 5/29/92, and a copy of the pesticide label are enclosed for your records.

Sincerely,

Joseph E. Miller  
Product Manager (23)  
Pesticide-Herbicide Branch  
Registration Division (H7200)

## FOR USE IN SOYBEANS

### ROTATIONAL CROP RESTRICTIONS IN SOUTHERN MICHIGAN

OBSERVE ALL PRECAUTIONARY STATEMENTS AND LIMITATIONS IN THE TRI-SCEPT LABEL BEFORE USING. SEE THE TRI-SCEPT LABEL FOR SPRAYING AND APPLICATION INFORMATION, WEEDS CONTROLLED, AND USE RATES. WHEN TANK MIXING, ALWAYS FOLLOW THE MORE RESTRICTIVE LABEL.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. DO NOT apply this product through any type of irrigation system. This label must be in the possession of the user at the time of herbicide application.

#### DIRECTIONS FOR USE

A single preplant incorporated application of TRI-SCEPT may be made at the 2.33 pints per acre rate.

#### USE AREA

The above application can be made in southern Michigan (including the counties of Berrien, Cass, St. Joseph, Branch, Hillsdale, Lenawee, Monroe, Van Buren, Kalamazoo, Calhoun, Jackson, Washtenaw, Wayne, Allegan, Barry, Eaton, Ingham, Livingston, Oakland and Macomb).

#### ROTATIONAL CROP RESTRICTIONS

Soybeans  
Wheat  
Field Corn

No restriction  
4 months  
See below\*

ACCEPTED  
18 JUN 1992  
Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered to EPA Reg. No. 241-307

\*If available in your area, field corn hybrids which are classified as tolerant or resistant to TRI-SCEPT and/or other imidazolinone herbicides may be planted in the spring of the year following a TRI-SCEPT application. Contact your chemical dealer, seed supplier, or American Cyanamid to obtain a list of field corn hybrids. If rotation to tolerant or resistant hybrids is planned, it is recommended that seed availability be confirmed prior to TRI-SCEPT application. Other field corn hybrids may be planted 18 months after TRI-SCEPT application.

Consult the TRI-SCEPT label for rotational crop restrictions involving other crops, other TRI-SCEPT application options, sequential herbicide applications, or tank mixtures with other herbicides.

Use of TRI-SCEPT herbicide in accordance with label directions is expected to result in normal growth of rotational crops in most situations; however, various environmental and agronomic factors make it impossible to eliminate all risks associated with the use of this product and, therefore, rotational crop injury is always possible.
