SUPPLEMENTAL LABELING
PURSUIT® herbicide

EPA Reg. No. 241-310

FOR USE IN SOYBEANS

ADDITION OF CROP OIL CONCENTRATES (COC) TO PURSUIT
FOR POSTEMERGENCE WEED CONTROL

OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE PURSUIT LEAFLET LABEL BEFORE USING. SEE THE PURSUIT LEAFLET LABEL FOR USE AREA, APPLICATION INFORMATION, WEEDS CONTROLLED AND ROTATIONAL CROP RESTRICTIONS.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. DO NOT apply this product through any type of irrigation system.

POSTEMERGENCE APPLICATIONS OF PURSUIT REQUIRE THE ADDITION OF AN ADJUVANT AND A LIQUID FERTILIZER SOLUTION.

I. ADJUVANTS

SURFACTANTS: Use a non-ionic surfactant containing at least 80% active ingredient. Apply the surfactant at the rate of 1 qt./100 gal. or use the surfactant Dash¹ at the rate of 1 qt./acre. When weeds are under moisture or temperature stress, the surfactant Dash is recommended.

CROP OIL CONCENTRATE: Instead of a surfactant, a petroleum or vegetable seed oil (such as SUN-IT II[™]) based crop oil concentrate may be used. SUN-IT II is recommended when weeds are under moisture or temperature stress. Use SUN-IT II at the rate of 1.5 to 2 pts./acre (use the higher rate when weeds are at the maximum label size). Other crop oil concentrates should be used at 1.5 pts./A.

II. LIQUID FERTILIZER SOLUTION

Recommended nitrogen based fertilizers include liquid fertilizers (such as 28%N, 32%N or 10-34-0) at the rate of 1-2 qts./acre. Use the higher rate when weeds are under moisture or temperature stress. Instead of a liquid fertilizer, spray grade ammonium sulfate may be used at the rate of 4 lbs./acre.

Refer to the PURSUIT leaflet label for MIXING and SPRAYING instructions. This label must be in the possession of the user at the time of herbicide application (when using crop oil concentrates).
