POSTEMERGENCE APPLICATIONS OF PURSUIT REQUIRE THE ADDITION OF AN ADJUVANT AND A LIQUID FERTILIZER SOLUTION.

I. ADJUVANTS

SURFACTANTS: Use a non-ionic surfactant containing at least 80% active ingredient. Apply the surfactant at the rate of 1 qt./100 gal.

OR

CROP OIL CONCENTRATE: Instead of a surfactant, a petroleum or vegetable seed oil (such as SUN-IT II™) based crop oil concentrate may be used. SUN-IT II is recommended when weeds are under moisture or temperature stress. Use SUN-IT II at the rate of 1.5 to 2 pts./acre (use the higher rate when weeds are at the maximum label size). Other crop oil concentrates should be used at 1.5 pts./acre.

AND

II. LIQUID FERTILIZER SOLUTION

Recommended nitrogen based fertilizers include liquid fertilizers (such as 28%N, 32%N or 10-34-0) at the rate of 1 - 2 qts./acre. Use the higher rate when weeds are under moisture or temperature stress. Instead of a liquid fertilizer, spray grade ammonium sulfate may be used at the rate of 4 lsb./acre.
ROTATIONAL CROP GUIDELINES

When using PURSUIT applied after applications of SCEPTER, SQUADRON or TRI-SCEPT, rotational crops may be planted at the following intervals:

1. Anytime:
   Soybeans

2. Nine and one-half months after PURSUIT application:
   Wheat

3. Eighteen months after PURSUIT application:
   All crops not listed elsewhere in the ROTATIONAL CROP GUIDELINES section

4. Twenty six months after PURSUIT application:
   Canola (Rapeseed)  Onions
   Carrots           Potatoes
   Celery            Spinach
   Cole crops        Sugarbeets
   Garlic            Tomatoes

Refer to the ROTATIONAL CROP RESTRICTIONS on the SCEPTER, SQUADRON or TRI-SCEPT label. Follow the more restrictive label (SCEPTER, SQUADRON, or TRI-SCEPT and PURSUIT).

This label must be in the possession of the user at the time of herbicide application.

PURSUIT AND GRASS HERBICIDES FOR CONTROL OF VOLUNTEER CORN AND GRASSES

OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE PURSUIT LEAFLET LABEL BEFORE USING. SEE THE PURSUIT LEAFLET LABEL FOR USE AREA, MIXING AND APPLICATION INFORMATION, WEEDS CONTROLLED AND ROTATIONAL CROP RESTRICTIONS.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. DO NOT apply this product through any type of irrigation system.

A selective postemergence grass herbicide such as Select¹, Poast Plus², Fusilade 2000³, Assure⁴ or Option⁵ may be mixed with PURSUIT to control volunteer corn or grasses not controlled by PURSUIT. In some cases the activity of the grass herbicide may be reduced when mixed with PURSUIT. The reduction in activity may be overcome by delaying the application of the postemergence grass herbicide 7 days following the application of PURSUIT. Refer to the respective grass herbicide label for recommended application rate, weed size and restrictions.

When PURSUIT is used in combination with another herbicide, refer to the respective label for rates, methods of application, proper timing, weeds controlled, restrictions and precautions. Always use in accordance with the more restrictive label restrictions and precautions. No label dosages should be exceeded. PURSUIT cannot be mixed with any product containing a label prohibiting such mixtures.

This label must be in the possession of the user at the time of herbicide application.

GENERAL INFORMATION

PURSUIT Herbicide is a broad spectrum herbicide that provides season long control of many weeds. Under some conditions (such as heavy texture soil, high organic matter, low pH or low rainfall) PURSUIT may cause injury to subsequent planted crops. Sugar beets are particularly sensitive to PURSUIT residues in soil. PURSUIT is not recommended in crop rotations that include sugar beets. See the ROTATIONAL CROP section of this supplemental label for rotations to other sensitive crops.
