

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under
EPA Reg. No. 241-210

FOR USE IN SUCCULENT PEAS, DRY EDIBLE PEAS, LENTILS, AND CHICKPEAS

PURSUIT can be used on succulent peas, dry edible peas (including chickpeas) and lentils in Washington (Adams, Asotin, Columbia, Garfield, Spokane, Walla Walla and Whitman counties), Idaho (Benewah, Clearwater, Idaho, Kootenai, Latah, Lewis, and Nez Perce counties), Oregon (Union, Umatilla and Wallowa counties) and Montana only.

THIS LABEL EXPIRES DECEMBER 31, 1996

OBSERVE ALL PRECAUTIONARY STATEMENTS AND SPRAYING AND APPLICATION INFORMATION IN THE PURSUIT LEAFLET LABEL BEFORE USING. APPLY WITH GROUND EQUIPMENT ONLY.

GENERAL INFORMATION

Reduced crop growth, quality, yield and/or delayed maturity may result from a PURSUIT application to peas and lentils. Since crop maturity may be delayed, timing of harvest may need to be adjusted accordingly. **DO NOT** apply PURSUIT if planting is delayed and chance of frost prior to maturity is likely.

DO NOT apply PURSUIT if cold and/or wet conditions are present or predicted to occur within one week of application.

USE PURSUIT ONLY if proper agronomic practices have been utilized, including good soil fertility, proper crop rotation, disease and insect management and tillage practices that eliminate compaction and hardpans. Plant peas or lentils at least 1/2 inch deep to reduce risk of crop injury.

Use of PURSUIT herbicide in accordance with label directions is expected to result in normal growth of rotational crops in most situations; however, various environmental and agronomic factors make it impossible to eliminate all risks associated with the use of this product and, therefore, rotational crop injury is always possible.

DISCLAIMER

THE USER ASSUMES ALL RISKS AND CONSEQUENCES ASSOCIATED WITH APPLICATIONS OF PURSUIT TO EDIBLE LEGUME VEGETABLE CROPS.

REFER TO THE PURSUIT LEAFLET LABEL FOR ADDITIONAL DISCLAIMER STATEMENTS.

*Registered Trademark of American Cyanamid Company

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **DO NOT** apply this product through any type of irrigation system. This label must be in the possession of the user at the time of herbicide application.

DO NOT apply by air.

DO NOT apply PURSUIT in any manner not specifically described in this label.

Sensitive crops such as sugar beets, canola, and leafy vegetables may be injured by spray drift or other indirect contact with PURSUIT.

Spray equipment used for PURSUIT applications must be drained and thoroughly cleaned with water before being used to apply other products.

DO NOT make more than one application of PURSUIT per year.

Allow at least 30 days between application and harvest of succulent peas.

Allow at least 60 days between application and harvest of dry edible peas, chickpeas, and lentils.

When PURSUIT is used in combination with another herbicide, refer to the respective label for rates, methods of application, proper timing, weeds controlled, restrictions and precautions. Always use in accordance with the more restrictive label restrictions and precautions. No label dosages should be exceeded. PURSUIT cannot be mixed with any product containing a label prohibiting such mixtures.

emergence.

PURSUIT may be tank-mixed with Sencor DF¹ or Lexone DF² to assist in the control of lambsquarters or mayweed-chamomile (dogfennel). Refer to the Sencor or Lexone label for proper application rates and restrictions.

WEEDS CONTROLLED

PURSUIT applied at the broadcast rate of 3 ounces per acre preplant incorporated or preemergence will control:

Buckwheat, wild	Mustard, wild	Nightshade, hairy	Thistle, Russian
Kochia	Nightshade, black	Pigweed, redroot	
Lambsquarter, common*	Nightshade, Eastern black	Shepherdspurse	

*preplant incorporated applications only

ROTATIONAL CROP GUIDELINE

The following crops may be planted after applying PURSUIT as recommended in this label:

- Anytime
 - Chickpeas
 - Lentils
 - Peas
 - Lima beans
 - Peanuts
 - Soybeans
 - IMI-Corn
- Four months after PURSUIT application:
 - Barley
 - Edible beans (dry, snap)
 - Rye
 - Wheat
- Nine and one-half months after PURSUIT application:
 - Field corn
 - Field corn grown for seed**
 - Tobacco
- Eighteen months after PURSUIT application:
 - Alfalfa
 - Cotton
 - Lettuce
 - Oats
 - Popcorn
 - Safflower
 - Sorghum
 - Sweet Corn
- Twenty-six months after PURSUIT application:
 - All crops not listed elsewhere in this ROTATIONAL CROP GUIDELINE.
- Forty months after PURSUIT application:
 - Sugar beets

BEST AVAILABLE COPY

In the event of a crop loss, peas, lentils or chickpeas may be replanted.

DO NOT feed treated forage, hay, or straw to livestock.

****Several seed companies have tested a wide range of inbreds for sensitivity to PURSUIT soil residues and have reported good crop safety. However, due to the proprietary nature of seed production, American Cyanamid has not been given access to the inbred data. Growers are directed to contact the seed company for information and recommendations regarding the planting of corn grown for seed in fields treated with PURSUIT the previous year. Since growing conditions, environmental conditions and grower practices are beyond the control of American Cyanamid Company, all risks and consequences associated with planting seed corn inbreds into field treated previously with PURSUIT shall be assumed by the user.**

CONSULT THE PURSUIT LEAFLET LABEL FOR OTHER PRECAUTIONS.
