

**FOR USE IN SOYBEANS****SCEPTER O.T. PLUS ROUNDUP<sup>1</sup> TANK MIX FOR WEED CONTROL IN ROUNDUP  
READY<sup>2</sup> SOYBEANS**

OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE SCEPTER O.T. LEAFLET LABEL BEFORE USING. SEE THE SCEPTER O.T. LEAFLET LABEL FOR PRECAUTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, APPLICATION INFORMATION, USES WITH OTHER PRODUCTS AND ROTATIONAL CROP RESTRICTIONS.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of herbicide application. The use of SCEPTER O.T. herbicide not consistent with this labeling may result in injury to crops. Keep container closed to avoid spills and contamination. **DO NOT** apply this product through any type of irrigation system.

**GENERAL INFORMATION**

SCEPTER O.T. provides control of broadleaf and grass weeds when applied postemergence. SCEPTER O.T. can be applied to either conventional or no-till soybeans. Roundup may be tank-mixed with SCEPTER O.T. for enhanced control of weeds common to soybean production. When applied postemergence, tank mixes containing Roundup herbicide can only be applied to Roundup Ready soybeans. Refer to the SCEPTER O.T. label and the Roundup label for specific use recommendations, rates and weeds controlled.

**MIXING INSTRUCTIONS**

Fill the spray tank one-fourth to one-half full with clean water. When tank-mixing SCEPTER O.T. with Roundup, while agitating, add the required amount of SCEPTER O.T. to the spray tank first and make sure it is thoroughly mixed before adding the other herbicide; then fill the remainder of the tank with clean water. Maintain agitation while spraying to ensure a uniform spray mixture. For postemergence applications, add the nonionic surfactant as the last ingredient in the tank. To avoid injury to sensitive crops, spray equipment used for SCEPTER O.T. herbicide applications must be drained and thoroughly cleaned with water before being used to apply other products.

**USE RATE**

Refer to the SCEPTER O.T. and Roundup labels for recommended use rates.

**SCEPTER O.T. HERBICIDE USE AREA**

See SCEPTER O.T. leaflet label for use area and a description of Use Regions.

(See other side)

Use of SCEPTER O.T. herbicide in accordance with label directions is expected to result in normal growth of rotational crops in most situations; however, various environmental and agronomic factors make it impossible to eliminate all risks associated with the use of this product and, therefore, rotational crop injury is always possible.
