FOR USE IN SOYBEANS

SCEPTER O.T. AND ROUNDUP¹ (OR GLYPHOSATE CONTAINING PRODUCTS) FOR WEED CONTROL IN SOYBEANS AND SCEPTER USE IN ROUNDUP READY¹ SOYBEANS

OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE SCEPTER O.T. LEAFLET LABEL BEFORE USING. SEE THE SCEPTER O.T. LEAFLET LABEL FOR PRECAUTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, APPLICATION INFORMATION, USES WITH OTHER PRODUCTS AND ROTATIONAL CROP RESTRICTIONS.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of herbicide application. The use of SCEPTER O.T. herbicide not consistent with this labeling may result in injury to crops. Keep container closed to avoid spills and contamination. **DO NOT** apply this product through any type of irrigation system.

GENERAL INFORMATION

SCEPTER O.T. provides control of broadleaf and grass weeds when applied postemergence. SCEPTER O.T. can be applied to either conventional or no-till soybeans.

SCEPTER O.T. may also be applied to Roundup Ready soybeans.

Refer to the SCEPTER O.T. label and the Roundup or glyphosate containing product label for specific use recommendations, rates and weeds controlled.

No-till Soybeans (non-glyphosate resistant)

Apply SCEPTER O.T. plus Roundup or glyphosate containing product for weed control in no-till soybeans. Roundup or glyphosate containing products will enhance the control of weeds including marestail and prickly lettuce. Always include a nonionic surfactant in the spray solution. **DO NOT** apply Roundup or glyphosate containing products postemergence to non-glyphosate resistant soybeans.

Roundup Ready Soybeans (glyphosate resistant)

SCEPTER O.T. may be used for weed control in Roundup Ready soybeans. Apply SCEPTER O.T. for postemergence weed control. SCEPTER O.T. may be applied either prior to Roundup or glyphosate containing products or following Roundup or glyphosate containing products for general weed control and residual activity on broadleaf and grass weeds. For sequential treatments, a sufficient time period should occur between treatments to allow an appropriate assessment of weed control needs.

SCEPTER O.T. may be <u>tank-mixed</u> with other herbicides (not Roundup or glyphosate containing products) on Roundup Ready soybeans when applied postemergence. Refer to the SCEPTER O.T. label for recommended herbicides. Refer to the other herbicide labels for weeds controlled and recommended application rates.

as the last ingredient in the tank. To avoid injury to sensitive crops, spray equipment used for SCEPTER O.T. herbicide applications must be drained and thoroughly cleaned with water before being used to apply other products.

USE RATE

Refer to the SCEPTER O.T. and Roundup or glyphosate containing product labels for recommended use rates.

SCEPTER O.T. HERBICIDE USE AREA

See SCEPTER O.T. leaflet label for use area and a description of Use Regions.

APPLICATION INSTRUCTIONS

Refer to the SCEPTER O.T. label and the Roundup or glyphosate containing product label for additional information regarding WEEDS CONTROLLED, MIXING AND SPRAYING INSTRUCTIONS, PRECAUTIONARY STATEMENTS AND WORKER PROTECTION INFORMATION. Refer to the Roundup or glyphosate containing product label for additional information regarding application rates, restrictions, weeds controlled and other information.

When tank-mixing herbicides, always follow the most restrictive label.

Use of SCEPTER O.T. herbicide in accordance with label directions is expected to result in normal growth of rotational crops in most situations; however, various environmental and agronomic factors make it impossible to eliminate all risks associated with the use of this product and, therefore, rotational crop injury is always possible.
