RE: PURSUIT[®] PLUS EC Herbicide EPA Reg. No. 241-331

Notification of Minor Change to Supplemental Label for Fall Application of PURSUIT PLUS EC in a Planned Sequential Program Using Roundup¹ Ultra on Roundup Ready¹ Soybeans OPP Id. No. 276975

Dear Mr. Tompkins:

BASF Corporation hereby notifies EPA of a minor change to the supplemental label for PURSUIT PLUS EC herbicide (EPA Reg. No. 241-331) for fall application in a planned sequential program using Roundup Ultra on Roundup Ready Soybeans. The only change to the label was to delete the self-imposed expiration date.

In support of this notification, an application form and a copy of the proposed label are enclosed. A copy of the current label submitted as a notification on October 19, 2000 is enclosed as Exhibit 1. For convenience, five copies of the proposed supplemental label are included for your files.

Thank you for your continued assistance with the registration issues of this product. If there are any questions concerning this application, please contact me at (919)-547-2609.

Sincerely,

Nebus Lyohnston

FOR USE IN SOYBEANS

NOTIFICATION

JAN 3 0 2003

FALL APPLICATION OF PURSUIT PLUS EC IN A PLANNED SEQUENTIAL
PROGRAM USING ROUNDUP™ ULTRA ON ROUNDUP READY™ SOYBEANS

FOR DISTRIBUTION AND USE ONLY IN THE STATES OF ILLINOIS, INDIANA, IOWA, MICHIGAN, MINNESOTA (SEE USE AREA), NEBRASKA, AND WISCONSIN

OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE PURSUIT PLUS EC AND ROUNDUP LLTRA LABELING BEFORE USING. SEE THE PURSUIT PLUS EC LEAFLET LABEL FOR PRECAUTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, APPLICATION INFORMATION, WEEDS CONTROLLED, USES WITH OTHER PRODUCTS AND ROTATIONAL CROP RESTRICTIONS.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The use of **PURSUIT® PLUS EC** herbicide not consistent with this labeling may result in injury to crops. **DO NOT** apply this product through any type of irrigation system.

This label must be in the possession of the user at the time of herbicide application.

GENERAL INFORMATION

PURSUIT® PLUS EC provides control of many broadleaf and grass weeds when applied preplant or preemergence. **PURSUIT® PLUS EC** may be applied in the late fall for control of weeds in no-till or conventional soybeans, rather than in the spring prior to planting. Treated areas should be planted to RoundupTM Ready soybeans in the following spring, and, if required, RoundupTM Ultra applied in-season in a planned sequential program.

USE RATE

Apply **PURSUIT® PLUS EC** at the rate of 2.5 pints per acre. If heavy grass or waterhemp pressure is expected, add **PROWL® 3.3 EC** herbicide to the spray mixture at a rate of up to 1.25 pints per acre.

Apply RoundupTM Ultra at 1 to 1.5 pints per acre.

(see other side)

4 8 4

DIRECTIONS FOR USE

Apply **PURSUIT® PLUS EC** after October 31, and prior to ground freeze-up in the winter. Fall and winter precipitation will activate the herbicide for control of most winter annual weeds and spring germinating weeds in notill and conventional soybeans.

RoundupTM Ready soybeans should be planted in the spring following the fall application of **PURSUIT® PLUS EC**. If weeds emerge in-season, RoundupTM Ultra may be applied postemergence for weed control.

For fall applications in no-till systems, ensure that fields are weed free prior to application. If not, apply a burn-down application of Gramoxone Extra, Touchdown, or Roundup Ultra to control existing weeds.

Refer to the **PURSUIT® PLUS EC** product label for additional information on application instructions.

USE AREA

Fall applications of **PURSUIT® PLUS EC** may be made only in the states of Illinois, Indiana, Iowa, Michigan, Minnesota (south of state highway 210), Nebraska, and Wisconsin.

ROTATIONAL CROP INFORMATION

Refer to rotational crop restrictions listed in the PURSUIT® PLUS EC product label.

NOTE: For fall applications of **PURSUIT® PLUS EC**, adjust the rotational crop intervals by basing the interval on the date of soybean planting rather than the date of herbicide application.

Use of **PURSUIT® PLUS EC** herbicide in accordance with label directions is expected to result in normal growth of rotational crops in most situations; however, various environmental and agronomic factors make it impossible to eliminate all risks associated with the use of this product and, therefore, rotational crop injury is always possible.

RE: PURSUIT® PLUS EC Herbicide EPA Reg. No. 241-331
Notification of Minor Revision to Supplemental Label
for PURSUIT PLUS EC for Use in Soybeans
OPP Id. No. 276974

Dear Mr. Tompkins:

BASF Corporation hereby notifies EPA of a minor change to a supplemental label for PURSUIT PLUS EC herbicide (EPA Reg. No. 241-331) for use on soybeans in the states of Minnesota and North Dakota. The only change to the label is to delete the self-imposed expiration date.

In support of this notification, an application form and a copy of the proposed supplemental label are enclosed. A copy of the current label approved on April 23,2002 is also enclosed as the Approved Label. Five copies of the proposed supplemental label are included for your files.

Thank you for your assistance with the registration issues of this product. If there any questions regarding this application, please contact me at 919-547-2609.

Sincerely,

Rebecca L. Johnston

Supplemental Labeling

EPA Reg. No. 241-331

FOR USE IN SOYBEANS

NOTIFICATION

JAN 3 0 2003

FOR USE IN THE STATES OF MINNESOTA (NORTH OF STATE HIGHWAY 210, SOUTH OF STATE HIGHWAY 2) AND NORTH DAKOTA (SOUTH OF STATE HIGHWAY 2)

OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE PURSUIT PLUS EC LABELING BEFORE USING. SEE THE PURSUIT PLUS EC LEAFLET LABEL FOR PRECAUTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, APPLICATION INFORMATION, WEEDS CONTROLLED, USES WITH OTHER PRODUCTS AND ROTATIONAL CROP RESTRICTIONS.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The use of PURSUIT® PLUS EC herbicide not consistent with this labeling may result in injury to crops. DO NOT apply this product through any type of irrigation system.

This labeling must be in the possession of the user at the time of herbicide application.

GENERAL INFORMATION

PURSUIT PLUS EC may be applied preplant incorporated to soybeans for early season weed control and residual activity on broadleaf weeds and grass weeds. If weeds emerge later, a diphenylether such as STATUS® herbicide, or a registered grass herbicide, may be applied postemergence for control of broadleaf weeds and grass weeds, respectively. For control of emerged weeds in Roundup Ready™ soybeans, Roundup™ Ultra may be applied postemergence. For sequential treatments, a sufficient time period should elapse between treatments to allow an appropriate assessment of weed control needs.

NOTE: DO NOT apply Roundup Ultra postemergence to non glyphosate-resistant soybeans.

USE RATE

Apply PURSUIT PLUS EC preplant incorporated at a rate of 1.8 pints per acre. If heavy grass or waterhemp pressure is expected, PROWL 3.3 EC herbicide may be added to the spray mixture at a rate up to 1.75 pints per acre.

APPLICATION INFORMATION

PURSUIT PLUS EC may be applied following land preparation and should be thoroughly incorporated to a depth of 1 to 2 inches. Applications may be made up to 45 days prior to planting (early preplant). Incorporate prior to soybean planting and within 7 days of application.

WEEDS CONTROLLED

When applied as directed, PURSUIT PLUS EC will control (C) or reduce competition (R) from the following weeds:

Broadleaf Weeds Controlled	Level of Control
Cocklebur, common	R
Kochia	C*
Lambsquarters, common	С
Mallow, Venice	R
Mustard species	С
Nightshade,	
black	С
Eastern black	С
hairy	С
Pigweed,	
redroot	С
smooth	С
Sunflower, common	R
Velvetleaf	C

Grass Weeds Controlled Barnyardgrass	Level of Control C
Crabgrass,	
large	R
smooth	R
Cupgrass, woolly	R
Foxtail,	
giant	С
green	С
yellow	С
Millet, wild-proso	R

^{*}If kochia is resistant to ALS/AHAS inhibitors, then it will not be controlled by this or other products with the ALS/AHAS mode of action. A sequential program and, or a tank mix partner with another herbicide mode of action must be used to control ALS/AHAS-resistant kochia.

USE AREA

PURSUIT PLUS EC applied preplant incorporated at a rate of 1.8 pints per acre may be used in the states of Minnesota (north of State Highway 210, south of State Highway 2), and North Dakota (south of State Highway 2).

ROTATIONAL CROP INFORMATION

Barley and winter wheat may be planted 18 months after application of PURSUIT PLUS EC at the recommended rate. For other rotational crops, refer to the guidelines provided in the PURSUIT PLUS EC product label.

Use of PURSUIT PLUS EC herbicide in accordance with label directions is expected to result in normal growth of rotational crops in most situations; however, various environmental and agronomic factors make it impossible to eliminate all risks associated with the use of this product and, therefore, rotational crop injury is always possible.
