Application for Pesticide - Section I

1. Company/Product Number 241-337	2. EPA Product Manager Mr. James Tompkins	3. Proposed Classification <input checked="" type="checkbox"/> None <input type="checkbox"/> Restricted
4. Company/Product (Name) PROWL 3.3 EC Herbicide	PM# 25	
5. Name and Address of Applicant (Include ZIP Code) BASF Corporation P.O. Box 400 Princeton, NJ 08543-0400 <input type="checkbox"/> Check if this is a new address	6. Expedited Review. In accordance with FIFRA Section 3(c)(3) (b)(i), my product is similar or identical in composition and labeling to: EPA Reg. No. _____ Product Name _____	

Section - II

<input type="checkbox"/> Amendment - Explain below.	<input type="checkbox"/> Final printed labels in response to Agency letter dated _____	NOTIFICATION FEB 28 2001
<input type="checkbox"/> Resubmission in response to Agency letter dated _____	<input type="checkbox"/> "Me Too" Application.	
<input checked="" type="checkbox"/> Notification - Explain below.	<input type="checkbox"/> Other - Explain below.	

Explanation: Use additional page(s) if necessary. (For section I and Section II.)
Notification of removal of self-imposed expiration date from attached supplemental label per PR Notice 98-10. This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Section - III

1. Material This Product Will Be Packaged In:				2. Type of Container	
Child-Resistant Packaging <input type="checkbox"/> Yes <input type="checkbox"/> No	Unit Packaging <input type="checkbox"/> Yes <input type="checkbox"/> No	Water Soluble Packaging <input type="checkbox"/> Yes <input type="checkbox"/> No	Metal Plastic Glass Paper Other (Specify) _____		
* Certification must be submitted		If "Yes" Unit Packaging wgt. No. per container	If "Yes" Package wgt. No. per container		
3. Location of Net Contents Information <input type="checkbox"/> Label <input type="checkbox"/> Container		4. Size(s) Retail Container		5. Location of Label Directions <input type="checkbox"/> On Label <input type="checkbox"/> On Labeling accompanying product	
6. Manner in Which Label is Affixed to Product <input type="checkbox"/> Lithograph <input type="checkbox"/> Paper glued <input type="checkbox"/> Stenciled <input type="checkbox"/> Other _____					

Section - IV

1. Contact Point (Complete items directly below for identification of individual to be contacted, if necessary, to process this application.)		
Name Frederick L. Groya, Ph.D.	Title Senior Global Regulatory Affairs Manager	Telephone No. (Include Area Code) 509.276-3130
Certification I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.		6. Date Application Received (Stamp)
2. Signature <i>Frederick L. Groya</i>	3. Title Senior Global Regulatory Affairs Manager	
4. Typed Name Frederick L. Groya, Ph.D.	5. Date February 21, 2001	

PROWL[®]

3.3 EC herbicide

Supplemental Labeling

2/3

EPA Reg. No. 241-337

NOTIFICATION

FEB 28 2001

FOR USE IN SOYBEANS

FOR DISTRIBUTION AND USE ONLY IN INDIANA, MICHIGAN AND OHIO

USE OF PROWL 3.3 EC HERBICIDE ALONE OR IN TANK MIXTURES AS PREEMERGENCE APPLICATIONS NORTH OF INTERSTATE 80

OBSERVE ALL PRECAUTIONARY STATEMENTS IN THE PROWL 3.3 EC AND TANK MIX PARTNER LEAFLET LABELS BEFORE USING. SEE THE PROWL 3.3 EC AND TANK MIX PARTNER LEAFLET LABELS FOR PRECAUTIONS, GENERAL INFORMATION, MIXING AND APPLICATION AND SPRAYING INSTRUCTIONS USE RATES, USES WITH OTHER PRODUCTS, WEEDS CONTROLLED, ROTATIONAL CROP RESTRICTIONS AND DISCLAIMERS. OBSERVE THE MOST RESTRICTIVE INSTRUCTIONS ON ANY PRODUCT LABEL.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This label must be in the possession of the user at the time of herbicide application.

CHEMIGATION: PROWL 3.3 EC may be applied through sprinkler irrigation systems in soybeans. Refer to the PROWL 3.3 EC and tank mix partner labels for use directions for chemigation. **DO NOT** apply tank mixture through any type of irrigation system unless the label instructions on chemigation of all products are followed.

PROWL 3.3 EC is not recommended for use on peat or muck soils.

GENERAL INSTRUCTIONS

PROWL 3.3 EC herbicide controls labeled annual grasses and certain broadleaf weeds as they germinate, but it will not control established weeds.

Destroy existing weeds before applying PROWL 3.3 EC. Unusually cold, excessively wet, or hot and dry conditions that delay germination or extend germination over a long period of time can reduce weed control.

Observe all use directions given in the PROWL 3.3 EC and tank mix partner label sections on precautions, general information, mixing and application instructions, uses with other products, weeds controlled, rotational crop restrictions and disclaimers. Always follow the most restrictive instructions on any product label.

(See reverse side)

Preemergence General Instructions for North of I-80

Use the following instructions when applying the recommended preemergence soil applications of PROWL 3.3 EC alone or in labeled tank mixtures in soybeans grown north of Interstate Highway 80 (I-80) in Indiana, Michigan and Ohio. **DO NOT** use this label in any other state.

A preemergence application of PROWL 3.3 EC may be applied **at planting or up to 2 days after planting** of soybeans. **DO NOT APPLY POSTEMERGENCE** to soybeans. Apply to a seedbed which is firm and free of clods. PROWL 3.3 EC may be applied in conventional, minimum and no-tillage systems. Observe all other instructions in the PROWL 3.3 EC leaflet label in the section on PROWL 3.3 EC TANK MIXTURES IN MINIMUM AND NO-TILL SYSTEMS.

Preemergence treatments are most effective in controlling weeds when adequate rainfall or overhead irrigation is received within 7 days after application. If moisture is insufficient to activate the herbicides, a shallow cultivation (preferably with a rotary hoe) should be made after emergence of soybeans, but while weeds are small enough to be controlled by mechanical cultivation, otherwise a postemergent herbicide treatment may be required.

A shallow, thorough mixing of soil after herbicide application with a rotary hoe or similar implement will improve consistency of performance and reduce dependency on rainfall to activate herbicides. If at least 1 inch of rainfall or mechanical incorporation does not occur before soybean emergence, crop injury may occur.

DO NOT overlap spray by aerial or ground equipment. Always check tank-mix compatibility with tank mix partners prior to filling spray tank.

Tank Mixtures and Sequential Applications

PROWL 3.3 EC may be preemergence applied north of I-80 using the rates below in tank mixture with the following products: 2,4-DB (Butyrac¹ brand 200), Roundup², Gramoxone Extra³, SCEPTER[®], SCEPTER[®] 70DG, PURSUIT[®], PURSUIT[®] DG, Sencor⁴/Lexone⁵,

Lorox⁵, Lasso², Dual⁶, Canopy⁵, and Preview⁵. Refer to the PROWL 3.3 EC leaflet label and tank-mix partner labels for all other use directions, restrictions and additional weeds controlled for these mixtures.

PROWL 3.3 EC may be preemergence applied north of I-80 using the rates below in sequential application followed by a postemergence product such as SCEPTER, SCEPTER 70DG, PURSUIT, or PURSUIT DG herbicides. Refer to the PROWL 3.3 EC leaflet label and sequential product label for all other use directions, restrictions and additional weeds controlled.

PROWL 3.3 EC Application Rates

Use the following rate table for all PROWL 3.3 EC preemergence treatments applied north of I-80. **Limitation:** Note that the maximum PROWL 3.3 EC application rate is 2.4 pints per acre for medium and fine texture soils.

Broadcast Rate per Acre of PROWL 3.3 EC Herbicide Alone or in Tank Mixture Applied Preemergence in Soybeans Grown North of I-80 in Indiana, Michigan and Ohio

Soil Texture	PROWL 3.3 EC (pints) Up to 3.0% Organic Matter*	PROWL 3.3 EC (pints) More than 3.0% Organic Matter*
COURSE	1.2 to 1.8	1.8
MEDIUM	1.8 to 2.4	1.8 to 2.4
FINE	1.8 to 2.4	2.4

*NOTES: Use the higher rate of PROWL 3.3 EC if heavy weed populations are anticipated, or if hard-to-control weed species will be present, or if extensive crop residues were present following seedbed preparation (minimum or no-till systems), or if soil organic matter falls in the high end of the range. Refer to the PROWL 3.3 EC leaflet label section on Soil Texture for soil type classifications. PROWL 3.3 EC is not recommended for use on peat or muck soils.
