<input checked="" type="checkbox"/> Notification - Explain below.	<input type="checkbox"/> Other - Explain below.

NOTIFICATION
JAN 22 1999

Explanation: Use additional page(s) if necessary. (For section I and Section II.)
 Notification of updating of self-imposed expiration date and addition of counties in use area per PR Notice 98-10. This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

1. Contact Point (Complete items directly below for identification of individual to be contacted, if necessary, to process this application.)		
Name Janet M. Overholt	Title Product Registrations Manager	Telephone No. (Include Area Code) 609-716-2410
Certification I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.		6. Date Application Received (Stamped)
2. Signature 	3. Title Product Registrations Manager	
4. Typed Name Janet M. Overholt	5. Date 1/15/99	

ASSERT[®]

SG

herbicide

Supplemental Labeling

EPA Reg. No. 241-349

**FOR USE IN WHEAT AND BARLEY
FOR USE IN IDAHO, OREGON AND WASHINGTON
December 31, 2000**

**ASSERT SG TANK MIX COMBINATION WITH AVENGE[®] WILD OAT HERBICIDE
FOR THE CONTROL OF WILD OATS**

POTATO FOLLOW CROPS

OBSERVE ALL PRECAUTIONARY STATEMENTS AND LIMITATIONS ON BOTH THE ASSERT SG AND AVENGE LEAFLET LABELS AND ON BROADLEAF TANK MIX PARTNER LABELS. FOLLOW THE MOST RESTRICTIVE USE PRECAUTIONS, DIRECTIONS, AND RECROPPING/ROTATIONAL LIMITATIONS THAT APPEAR ON ANY PRODUCT LABEL.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **DO NOT** apply this product through any type of irrigation system.

Consult the ASSERT SG leaflet label for tank mix application instructions. Consult the AVENGE leaflet label for wheat varietal restrictions and surfactant requirements.

This label must be in the possession of the user at the time of herbicide application. Review label just prior to follow crop planting.

FOLLOW CROPS

This label is for use ONLY in IDAHO, OREGON AND WASHINGTON.

DO NOT plant potatoes to be used for seed production for 15 months after the date of any ASSERT SG application on wheat or barley in any county.

Potatoes for other uses may be planted as a rotational crop 11 months after a tank mix application of 5.6 oz./acre of ASSERT SG plus 2 pts./acre of AVENGE on wheat and barley in the following counties.

	IDAHO		OREGON		WASHINGTON
Ada	Caribou	Madison	Baker		Adams
Bannock	Cassia	Minidoka	Malheur		Benton
Bingham	Clark	Oneida	Morrow		Franklin
Blaine	Elmore	Owyhee	Umatilla		Graft
Boise	Franklin	Payette	Union		Kittitas
Bonneville	Fremont	Power	Wallowa		Klickitat
Butte	Gem	Teton			Lincoln
Camas	Gooding	Twin Falls			Spokane
Canyon	Jefferson	Washington			Walla Walla
	Jerome				Yakima
	Lincoln				

DO NOT plant potatoes for 15 months after any ASSERT SG application in all other counties.

NOTIFICATION

JAN 22 1999

(continued on reverse side)

The 11 month rotation is allowed ONLY if a minimum of 13 inches of net* irrigation has been applied from the date of an ASSERT SG plus AVENGE tank mix application to October 15 of the same year. At least 11 inches of irrigation must be applied PRIOR to grain harvest, and at least 2 inches must be applied AFTER grain harvest and before October 15. Maintain written records for each field on gross irrigation amounts, dates, and equipment efficiency. Every effort should be made to assure the most uniform irrigation possible. DO NOT substitute rainfall nor snowfall for any part of the required irrigation.

* Use NET irrigation (gross irrigation x equipment efficiency). Consult an irrigation practices handbook from the University of Idaho Cooperative Extension Service for details.

The following additional practices are recommended to further minimize soil residues of ASSERT SG and reduce the risk of potato follow crop injury:

- 1) Pattern irrigation frequency to maintain consistent soil moisture, because dry soil retards ASSERT SG degradation.
- 2) Moldboard plow or deep disk (greater than 6 inches deep) after grain harvest and before October 15, but only in accordance with the Natural Resources Conservation Service recommendations for your area. Apply a minimum of 2 inches net irrigation before moldboard plowing or after deep disking.
- 3) Bedding in preparation for planting of potatoes should be done in the spring.

The following rotational crops may be planted the season after applying a tank mix application of ASSERT SG plus AVENGE at recommended rates on wheat and barley in all counties.

Barley	Corn	Edible Bean	Safflower
Soybean	Sunflowers	Wheat	

For other follow crops, follow instructions on the ASSERT SG leaflet label.

If ASSERT SG is used on a field treated during the same year with Ally¹, Express¹, Finesse¹, Glean¹, Harmony¹, or Harmony Extra¹, follow the most restrictive precautions, directions and recropping/rotation limitations that appear on the respective product labels.

Excessive moisture, drought, and/or cold temperatures may affect the performance of this tank mix as well as the residual effect on rotational crops.

DO NOT plant rotational crops in spray overlap areas, as follow crop injury may occur. The end user assumes all risks and consequences resulting from sprayer overlaps from ground and aerial applications.
