DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The use of PURSUIT DG herbicide not consistent with this labeling may result in injury to crops. **DO NOT** apply this product through any type of irrigation system. This label must be in the possession of the user at the time of herbicide application.

GENERAL INFORMATION

PURSUIT DG provides control of many broadleaf and grassy weeds when applied to the soil or postemergence and can be applied to either conventional or no-till soybeans. PURSUIT DG may be applied to all soybean varieties including both Roundup Ready² and non-glyphosate-resistant soybeans.

FirstRate may be applied with PURSUIT for enhanced control of common ragweed and giant ragweed. Recommended application timings include:

- 1) Apply PURSUIT DG postemergence following a soil application of FirstRate.
- 2) Apply PURSUIT DG and FirstRate in a tank-mixture for postemergence weed control.

When tank-mixing herbicides, always follow the most restrictive label.

USE RATE

Apply PURSUIT DG at the rate of 1.44 ounces per acre.
See the FirstRate label for recommended rates.
