OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

Jeffery H. Birk, Ph.D.
Regulatory Manager
BASF
26 Davis Drive
Research Triangle Park, NC 27709

APR 18 2008

Subject: Notification(s) for Label Revisions under PRN 98-10 and PRN 2007-4

Dear Dr. Birk:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notices (PRN) 98-10 and 2007-4 dated, February 29, 2008 for:

EPA Registration 241-375

Pendulum 2G Herbicide

The Registration Division (RD) has conducted a review of the request(s) for applicability under PRN 98-10 and PRN 2007-4 and finds that the label changes requested fall within the scope of PRN-98-10 and PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Joyce Edwards of my staff at 703-308-5479.

Sincerely,

Linda Arrington

Title

FOR USE IN

Turfgrass, Ornamentals, Landscape or Grounds Maintenance, and Noncropland Areas

Active Ingredient:

pendimethalin: N-(1-ethylpropyl)-3, 4-dimethyl-2, 6-dinitrobenzenamine.

Other Ingredients:

98.0%

100.0%

(40 lbs contains 0.8 lb of pendimethalin)

EPA Reg. No. 241-375

EPA Est No.

KEEP OUT OF REACH OF CHILDREN **CAUTION/PRECAUCION**

Si usted no entiende la étiqueta, busque a alguien para que se la explique à usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

See inside for complete First Aid, Precautionary Statements, Directions For Use, Conditions of Sale and Warranty, and state-specific crop and/or use site restrictions.

In case of an emergency endangering life or property involving product, call day or night 1-800-832-HELP (4357).

Net Contents:

FIRST AID		
if in eyes	 Hold eyes open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after first 5 minutes; then continue rinsing eyes. Call a poison control center or doctor for treatment advice. 	
lf on skin or clothing	 Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice. 	
lf swallowed	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by a poison control center or doctor. DO NOT give anything by mouth to an unconscious person. 	
	HOT LINE NUMBER	

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact BASF Corporation for emergency medical treatment information: 1-800-832-HELP (4357).

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS CAUTION

Causes moderate eye irritation. Harmful if absorbed through skin. Avoid contact with eyes, skin, or clothing.

Personal Protective Equipment (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for **Category A** on an EPA chemical-resistance category election chart.

Applicators and other handlers must wear:

- · Long-sleeved shirt and long pants
- Chemical-resistant gloves
- · Shoes plus socks

Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product.
 Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. **DO NOT** apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. **DO NOT** contaminate water when disposing of quipment washwaters.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This labeling must be in the possession of the user at time of pesticide application.

BASF Corporation does not recommend or authorize the use of this product in manufacturing, processing or preparing custom blends with other products for application to turf or ornamentals.

DO NOT APPLY Pendulum® 2G granule herbicide in greenhouses, shadehouses or other enclosed structures.

DO NOT APPLY this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

DO NOT enter or allow worker entry into treated areas during the restricted-entry interval (REI) of **24 hours**.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves
- Shoes plus socks

NONAGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

DO NOT enter or allow others to enter the treated area until dusts have settled.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR WEED CONTROL, CROP INJURY, OR RESIDUES.

STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE. DO NOT store above 120°F. Store in original containers and keep closed. Store in a cool, dry place.

PESTICIDE DISPOSAL. Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER DISPOSAL

(for paper or plastic bags)

Nonrefillable Container. DO NOT reuse or refill this container. Completely empty container into application equipment; then dispose of empty bag in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

Observe all cautions and limitations on this label and the labels of products used in combination with **Pendulum® 2G granule erbicide**. The use of **Pendulum 2G** not consistent with this

label can result in injury to crops, animals, or persons. Keep containers closed to avoid spills and contamination.

GENERAL INFORMATION

Pendulum 2G provides preemergence control of most annual grasses and certain broadleaf weeds as they germinate in any turfgrass site (lawns, sod, turf areas). Examples of such sites include but are not limited to: grounds or lawns around residential and commercial establishments, multifamily dwellings, military and other institutions, parks, airports, roadsides, schools, picnic grounds, athletic fields, houses of worship, cemeteries, golf courses, prairiegrass areas, and sod farms.

Pendulum 2G can be used in and around field-, liner-, and container-grown ornamental nurseries; established landscape ornamentals and ornamental gardens; listed groundcovers and bulbs; nonbearing fruit and nut trees; conifer and hardwood seedling nurseries; and for tree plantation site preparation and maintenance.

In addition, **Pendulum 2G** can be applied for general grounds maintenance around areas such as parking lots, driveways and roadsides, alleyways, bike and jogging paths, vacant lots, buildings, stone gardens and gravel yards, markers and fence lines, mulch beds and other similar areas. It may be used under asphalt or concrete treatments as part of a site preparation program.

Use **Pendulum 2G** for preemergence control of most annual grasses and certain broadleaf weeds as they germinate in any noncropland area such as railroad, utility, highway, and pipeline rights-of-way; highway guardrails, delineators, and sign posts; bridge abutments and approaches; utility substations; petroleum tank farms; pumping installations; storage areas; fence rows; windbreaks and shelterbelts; paved or gravel surfaces; established wildflower plantings, and other similar areas where weed control is desired.

Pendulum 2G controls weeds as they germinate but will not control established weeds. Therefore, areas to be treated should be free of established weeds. For the control of established weeds, **Pendulum 2G** may be used in conjunction with herbicides registered for postemergence use. Consult the labels of those herbicides for use rates, timings, and precautions or restrictions.

Unusually cold, excessively wet, or hot and day conditions that delay germination or extend germination overlailing period of time can reduce weed control.

The efficacy of **Pendulum 2G** will improve if the application is followed by 1/2 inch of rainfall or its equivalent in sorinkler irrigation. If **Pendulum 2G** is not activated by rainfall or irrigation within 30 days, erratic weed control may result.

Applied according to label directions and under normal growing conditions, **Pendulum 2G** will not cause injury to desirable plants. Overapplication can result in stand loss, plant injury, or soil residues. Uneven application can decrease weed control or cause plant injury.

Seedling diseases, cold weather, excessive moisture, high soil pH, high soil salt concentration, or drought can weaken seedlings and plants and increase the possibility of plant damage from **Pendulum® 2G granule herbicide**.

Pendulum 2G may cause temporary discoloration of treated surfaces. Sweep surface clean immediately to avoid staining.

Dry Fertilizers. Pendulum 2G may be mixed with dry fertilizers. When applied as directed, **Pendulum 2G**/dry fertilizer mixtures provide weed control equal to that provided by the same rates of **Pendulum 2G** applied alone.

TURFGRASS

APPLICATION RATES FOR TURF WEED CONTROL ¹				
Turfgrass Species	Weeds	Pendulum 2G Rate	Comments	
COOL SEASON GRASS				
Bluegrass, Kentucky Fescue, fine Fescue, tall Ryegrass, perennial	Barnyardgrass Crabgrass Evening primrose Fall panicum Foxtail Hop clover Knotweed	75 to 100 lbs/acre as the initial application prior to weed germination in the spring.	Apply a repeat application of 51 to 75 lbs/acre after 5 to 8 weeks for extended control or where heavy weed infestations are expected.	
	Oxalis <i>Poa annua</i> Prostrate spurge Purslane			
	Goosegrass	Residential ² Turf Uses Only: 75 to 100 lbs/acre in the spring prior to weed germination.	Apply a repeat application of 75 lbs/acre after 5 to 8 weeks if the lower rate was used initially or for extended goosegrass control.	
) · · · · · · · · · · · · · · · · · · ·		Industrial and Commercial Turf Uses: 75 to 150 lbs/acre in the spring prior to weed germination.		
	Chickweed Corn speedwell Cudweed Henbit Lawn burweed Poa annua	75 to 100 lbs/acre	Apply in late summer or early fall prior to weed germination.	
Bentgrass or established Poa annua ³ (1/2-inch height or taller)	Barnyardgrass Crabgrass Evening primrose Fall panicum Foxtail Hop clover Knotweed Oxalis	75 lbs/acre in the spring prior to weed germination.	Apply a repeat application of 51 to 75 lbs/acre after 5 to 8 weeks where heavy weed infestations are expected.	
	<i>Poa annua</i> Prostrate spurge Purslane			
	Goosegrass	75 lbs/acre in the spring prior to weed germination. Apply a repeat application of 75 lbs/acre after 5 to 8 weeks.	00000 00000 00000 00000 00000 00000 0000	
	Chickweed Corn speedwell Cudweed Henbit Lawn burweed Poa annua	75 to 100 lbs/acre	Apply in late summer or early fail prior to weed germination.	

TURFGRASS

APPLICATION RATES FOR TURF WEED CONTROL ¹ (continued)			
Turfgrass Species	Weeds	Pendulum [®] 2G granule herbicide Rate	Comments
WARM SEASON GRASS			
Bahiagrass Bermudagrass Buffalograss	Barnyardgrass Crabgrass Evening primrose	Residential ² Turf Uses Only: 75 to 100 lbs/acre in the spring prior to weed germination.	Apply a repeat application of 51 to 75 lbs/acre after 5 to 8 weeks if necessary.
Centipedegrass Fescue, tall <i>Paspalum</i> , seashore St. Augustinegrass Zoysiagrass	Fall panicum Foxtail Hop clover Knotweed Oxalis Poa annua Prostrate spurge Purslane	Industrial and Commercial Turf Uses: 75 to 150 lbs/acre in the spring prior to weed germination.	
	Goosegrass	75 lbs/acre prior to weed germination in the spring. Apply a repeat application of 75 to 100 lbs/acre after 5 to 8 weeks.	An additional application of 75 lbs/acre may be applied for extended goosegrass control 8 weeks after the second application.
	Chickweed Corn speedwell Cudweed Henbit Lawn burweed Poa annua	75 to 100 lbs/acre	Apply in late summer or early fall prior to weed germination.

¹ DO NOT exceed a maximum rate of 100 pounds per acre per application for use on residential turfgrass.

Not for use on bentgrass or Poa annua greens or tees.

The efficacy of **Pendulum 2G** will be improved if the application is followed by 1/2 inch of rainfall or its equivalent in sprinkler irrigation. If **Pendulum 2G** is not activated by rainfall or irrigation within 30 days, erratic weed control may result.

Pendulum 2G can be applied before or after postemergence herbicides used to control emerged weeds in turfgrass. For annual grass control, applications can be made with **Acclaim® Extra** or MSMA to control emerged weeds. Broadleaf weeds can be controlled using **Trimec®**, **Three-Way®**, 2,4-D, and other similar products.

TURFGRASS PRECAUTIONS

Use on well-established turfgrass with a dense and uniform stand. On newly planted areas, application should not be made until the turfgrass has filled in and has been mowed at least four times. On turf that has been thinned or damaged due to winter injury, excessive moisture, etc., allow for turf recovery prior to making an application.

Applications made to overseeded warm season turfgrass may cause thinning or injury of the overseeded species.

DO NOT use on bentgrass or *Poa annua* greens and tees or injury may occur.

Delay reseeding or winter overseeding of treated turfgrass for at least 3 months following the last **Pendulum 2G** application. Delay sprigging turfgrass for 5 months after application.

INDUSTRIAL (UNIMPROVED) TURF

Industrial or unimproved turf areas often have a different spectrum of weeds to be controlled than those found in fine turf as escribed elsewhere in this leaflet. **Pendulum 2G** will control annual grasses and broadleaf weeds mentioned in that section

of this label as well as the following weeds that might germinate in established grass in rights-of-way, roadsides, construction sites, parks, substations, lots, or similar areas:

crowfootgrass, itchgrass, johnsongrass (from seed), junglerice, lovegrass (from seed), browntop panicum, Texas panicum, field sandbur, signalgrass, Mexican sprangletop, red sprangletop, witchgrass, woolly cupgrass, carpetweed, fiddleneck, filares, kochia, lambsquarters, pigweed, puncturevina, Florida püsley, London rocket, shepherdspurse, Pennsylvania, smartweed, annual spurge, and velvetleaf.

Apply before weeds germinate. Use posterifergence herbicide such as 2,4-D, MSMA, or similar product to control established weeds.

² Residential is defined as turf in any residential situation as well as schools, parks and playgrounds.

APPLICATION INSTRUCTIONS FOR PENDULUM® 2G GRANULE HERBICIDE

Apply with properly calibrated spreader equipment to provide uniform distribution. Check application routinely to determine proper calibration. Avoid overlaps that will increase rates above those specified.

void application when winds may cause drift.

Avoid unintentional contact of granules with driveways, stone, wood or other porous surfaces. Sweep immediately to avoid staining. If granules are crushed into surface, rinse thoroughly.

SUGGESTED SPREADER SETTINGS FOR TURF

To provide proper distribution, calibrate your spreader before application. 25 lbs treats 11,000 sq ft (1/4 acre) at the 100 lbs product per acre rate.

Spreader		Ground or PTO Speed (mph)	Width of Coverage (ft)	Rate Range (lbs of product per acre)		
				75	100	150

TREES (continued)			
Common Name	Scientific Name		
Maple, Japanese	Acer palmatum		
Maple, Norway	Acer platanoides		
Maple, paper-bark	Acer griseum		
Maple, red	Acer rubrum		
Maple, sugar	Acer saccharum		
Nannyberry, rusty	Viburnum rufidulum		
Oak, chinquapin	Quercus muehlenbergii		
Oak, live	Quercus virginiana		
Oak, pin	Quercus palustris		
Oak, red	Quercus rubra		
Oak, swamp chestnut	Quercus michauxii		
Oak, water	Quercus nigra		
Oak, white	Quercus alba		
Oak, willow	Quercus phellos		
Olive	Olea europaea		
Palm, date	Phoenix spp.		
Palm, fan	Washingtonia spp.		
Palm, pindo	Butia spp.		
Palm, Washington	Washingtonia spp.		
Peach	Prunus persica		
Pear, Bradford	Pyrus calleryana 'Bradford'		
Pecan	Carya illinoensis		
Pine, Austrian	Pinus nigra		
Pine, Italian stone	Pinus pinea		
Pine, loblolly	Pinus taeda		
Pine, Monterey	Pinus radiata		
Pine, red	Pinus resinosa		
Pine, Scotch	Pinus sylvestris		
Pine, Virginia	Pinus virginiana		
Pine, white	Pinus strobus		
Plum, purple leaf	Prunus cerasifera		
Poplar, black	Populus nigra		
Redcedar, Eastern	Juniperus virginiana 👓 o o		
Redcedar, Western	Thuja plicata		
Red ironbark	Eucalyptus sidero່ຽ່ງໂດກ ''Rosea'		
Redwood, dawn	Metasequoia glyptostroboides		
Sequoia, giant	Sequoiadendron giganteum		
Serviceberry	Amelanghier laevis		
Sourwood	Oxydendrum arboreum o		
Spruce, Colorado blue	9 0 6		
Spruce, dwarf Alberta			
	Picea giauca 'Albertiara'		
Spruce, Norway	, 1000 abios 0 (,		
Spruce, white	Picea glauca Liquidambar styraciflua		
Sveetgum			
Sycamore	Platanus occidentalis		
Trachycarpus Tulio trop	Trachycarpus spp.		
Tulip tree	Liriodendron tulipifera		
Walnut, black	Juglans nigra		
Willow, weeping	Salix babylonica		
Yellowwood	Cladrastis lutea		

Pendulum® 2G granule herbicide is safe around and over the top of the established plants listed below.

BEDDING PLANTS*

Scientific Name

*After planting bedding plants and before **Pendulum 2G** is applied, area to be treated should be watered sufficiently to pack soil around roots.

Pendulum 2G may be used on plant species not listed conthis label. The suitability for such uses should be determined by treating a small number of such plants at the specified rate. Treated plants should be evaluated to 2 months following treatment for possible injury.

THE USER ASSUMES RESPONSIBILITY FOR ANY CROP DAMAGE OR OTHER LIABILITY.

DO NOT treat plants grown for food or feed.

DO NOT use treated plants for food or feed.

^{*}Applications of **Pendulum 2G** to immature ferns (during periods of new growth of fronds) may result in some injury.

lot for use in California.

Pendulum® 2G granule herbicide is safe around and over the top of the established plants listed below.

Refer to APPLICATION RATE TABLE for rates.

ORNAMENTAL GRASSES		
Common Name	Scientific Name	
Beach grass	Ammophila breviligulata	
Fescue, blue	Festuca ovina	
Fescue, sheep	Festuca ovina	
Fountain grass	Pennisetum setaceum	
Pampas grass	Cortaderia selloana .	
Reed canary grass	Phalaris arundinacea	
Reed, giant	Arundo spp.	
Ribbon grass	Phalaris arundinacea	
Tufted hair grass	Deschampsia caespitosa	

ORNAMENTAL BULBS

Pendulum 2G may be applied for control of susceptible annual weeds in ornamental bulbs listed on the label (crocus, daffodil [narcissus], gladiolus, tulip, etc.). Apply **Pendulum 2G** prior to, during, or after bulb emergence. If weeds have already germinated, use a labeled postemergence herbicide to control emerged weeds.

WILDFLOWERS

Pendulum 2G may be applied for control of susceptible annual weeds in plantings of wildflowers listed on the label (blackeyed susan, California poppy, coreopsis, oxeye daisy, etc.).

Pendulum 2G may be applied to established perennial wildowers before emergence of weeds or wildflowers. For wildowers being established from seed, apply Pendulum 2G after wildflowers have emerged but prior to weed germination. If weeds have already germinated, use a labeled postemergence product to control emerged weeds.

Due to the diversity of species and varieties which exist in areas where wildflowers are grown, the response to **Pendulum 2G** may vary greatly. Careful testing on desirable species is recommended to determine if area-wide applications can be made.

ORNAMENTAL PRECAUTIONS

Apply **Pendulum 2G** to established plantings. **DELAY** applying **Pendulum 2G** to seedbeds, transplant beds, or liners until plants have become well rooted. Care must be taken that soil or planting mixes have settled firmly following transplanting and that there are no cracks that would allow direct contact of **Pendulum 2G** with roots. Applications where soil and media surfaces are uniformly covered will result in best weed control and ornamental tolerance. Plant only those desirable plant species listed on this label into soil treated the previous season with any **Pendulum** product or injury may occur.

For container-grown ornamentals, delay first application of this product to bare root liners 2 to 4 weeks after transplanting.

DO NOT APPLY Pendulum 2G in greenhouses, hadehouses or other enclosed structures.

LANDSCAPE AND GROUNDS MAINTENANCE

Pendulum 2G can be incorporated into landscape and grounds maintenance programs to provide extended preemergence control of most annual grasses and certain broadleaf weeds. Areas to be treated, such as mulch beds, parking areas and roadsides, fencelines and borders, around statuary or monuments, and similar areas, should be free of emerged weeds before application. To remove emerged weeds, either cultivate or apply a postemergence product labeled for such use.

Refer to **APPLICATION RATE TABLE** for rates. Avoid unintentional contact of granules with stone, wood, or other porous surfaces as staining may occur. Sweep immediately to avoid staining. If granules are crushed into surface, rinse thoroughly.

NONBEARING FRUIT AND NUT CROPS AND VINEYARDS

Pendulum 2G may be applied for preemergence control of most annual grasses and certain broadleaf weeds on the following nonbearing crops:

Almond	Grape	Pistachio
Apple	Nectarine	Plum
Apricot	Olive	Prune ·
Cherry	Peach	Walnut, English
Citrus ·	Pear	
Fig	Pecan	•

Refer to APPLICATION RATE TABLE for rates.

Apply granules directly to the ground below the trees or vines. Care must be taken that soil or planting mixes have settled firmly following transplanting and that there are no cracks that would allow direct contact of **Pendulum 2G** and roots. Applications where soil and media surfaces are uniformly covered will result in best weed control and plant tolerance. For newly transplanted and one-year-old grapevines, apply only when they are dormant. **DO NOT** apply if buds have started to swell.

Pendulum 2G may be used where the roots of a fruit, vine, nut, or ornamental plant encroach into a treatable area:

NONCROPLAND AREAS COUNTY INCLUDING TREE PLANTATIONS

Use **Pendulum 2G** for grounds maintenance if i noncropland areas; preemergence control of the weed species listed in and around established tree plantations (including Christmas trees); in and around established ornamentals planted in noncropland areas such as highway rights-of-way and utility substations. **Pendulum 2G** may be used for hardwood and conifer regeneration on conservation reserve program land or similar areas.

Refer to APPLICATION RATE TABLE for rates.

Pendulum 2G may be applied at planting or to established trees. When making an application at planting, it is important that slit closure be achieved to prevent **Pendulum 2G** from directly contacting the tree roots or being washed into the root zone via the open slit, or root stunting may occur.

TOTAL VEGETATION CONTROL

Pendulum® 2G granule herbicide may be mixed with a granular formulation or used in sequence with any formulation of Arsenal® herbicide, Roundup Pro®, Karmex®, Finale®, Just®, diuron, or other products to provide bare ground or total vegetation control. Pendulum 2G can be used to provide greater plant selectivity in areas where such action may be desired. Such sites might have roots of landscape vegetation, ornamentals, or desirable trees encroaching into the treated zone.

Applications may be made to existing weeds controlled by the partner herbicide. Rates should be determined from the product labels prior to use. Follow the most restrictive label instructions.

For Kochia: Use applications of Pendulum 2G following Arsenal or diuron if control has been a problem for other herbicides.

APPLICATION RATE TABLE

For preemergence control of the weed species listed using broadcast spreader equipment, apply **Pendulum 2G** at the following rates:

Length of Control	Pounds required to treat 1 acre	Pounds required to treat 1000 sq ft
Short Term (2 to 4 months)	100.	2.3
Long Term (6 to 8 months)	200	4.6

late settings for a specific type of spreader device must be determined by applicator. To deliver the proper rate (2.3 to 4.6 lbs/1000 sq ft), calibrate prior to application of product.

One bag (40 lbs) will cover 1/5 acre (8700 sq ft) at a rate of 4.6 lbs per 1000 sq ft.

The efficacy of **Pendulum 2G** will improve if the application is followed by 1/2 inch of rainfall or its equivalent in sprinkler irrigation. If **Pendulum 2G** is not activated by rainfall or irrigation within 30 days, erratic weed control may result.

Pendulum 2G will not control established weeds.

If weeds should develop prior to activation of herbicide, shallow cultivate to destroy existing weeds or, where practical, remove by hand. When cultivating for any reason, it should be shallow. **Pendulum 2G** may be used before or after applications of herbicides registered for postemergence use (i.e. **Roundup®** or **Finale**) for the control of established weeds. **DO NOT** apply sprays containing **Roundup** or **Finale** over the top of desirable plants. A **Pendulum 2G** treatment may be followed by any registered herbicide to control weeds not listed on the **Pendulum 2G** label.

WEED SPECIES CONTROLLED

Use **Pendulum 2G** for preemergence control of the weed species listed. Applications can be made around and over the top of the ornamentals and to the sites listed on this label.

Conditions of Sale and Warranty

The **Directions For Use** of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW. BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER'S EXCLUSIVE REMEDY AND BASF'S EXCLUSIVE LIABILITY. WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, SPECIAL OR INDIRECT: DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.

U.S. Environmental Protection Agency Office of Pesticide Programs (7505P) Document Processing Desk 7504P (NOTIF) Room S-4900 One Potomac Yard 2777 S. Crystal Drive Arlington, VA 22202 Attention: Mr. James Tompkins, (PM 25)

RE: Notification:

Labeling changes for Pendulum® 2G herbicide

EPA Reg. No. 241-375

Dear Mr. Tompkins:

BASF is hereby submitting a notification of minor label changes for Pendulum 2G herbicide (EPA Reg. No. 241-375). The changes include the removal of several ornamental species from pages 9 and 10 and the addition of footnote 1 to prohibit use on several ornamentals in California. We have also taken the opportunity to update the container disposal statement for Nonrefillable Container, as per PRN 2007-4.

Enclosed please find:

- Application form 8570-1
- CD containing electronic copy of the label
- Certification with Respect to Label Integrity
- Pendulum 2G herbicide label.
- Current Pendulum 2G herbicide label

No PRIA fee is required for this notification.

Thank you for your assistance with this matter. If you should have any questions, please feel free to call me at (919) 547-2622.

Regards,

Jeffrey H. Birk, Ph.D. Regulatory Manager Phone 919-547-2622
