.

Page 2 EPA Reg. 241-387

2. To the First Aid section, change "If on Skin" to "If on Skin or Clothing".

3. Delete the text "Remove contaminated clothing and wash before reuse" from the Hazards to Humans and Domestic Animals statements.

4. Because the acute toxicity review specifies gloves for all handlers, the text "for all mixers and loaders, plus applicators using handheld equipment" must be deleted from the glove statement in the PPE section.

5. Because this product only contains uses that are outside of the scope of WPS, Agricultural Use Requirements and **Non-Agricultural** Use Requirements boxes are not needed for this product. The Non-Agricultural Use Requirements box should be deleted but the text "Do not enter or allow others to enter the treated areas until sprays have dried" must remain on the label.

6. On page 3, change "Arsenal 75 SG herbicide should be used only in accordance with recommendations" to "Arsenal 75 SG herbicide must be used only in accordance with directions". Change "General Information" to "Product Information". Change "such as railroad" to "including railroad" and delete "and other similar areas". Change "Arsenal 75 SG is recommended" to "Arsenal 75 SG may be used".

7. On page 4, change "uniformly apply the recommended amount" to "uniformly apply the specified amount". On page 6, change "specific recommendations" to "specific directions". On page 7, change this product is not recommended for use under pavement" to "this product is not to be used under pavement". On page 8, change "in accordance with the recommendations" to "in accordance with the directions".

A stamped copy of the label is enclosed for your records. You must submit one copy of the final printed label before you release the product for shipment. Products shipped after 12 months from the date of this letter or the next printing of the label whichever occurs first, must bear the new revised label. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA. Your release for shipment of the product constitutes acceptance of these conditions. This label supersedes all other previously accepted labels. If you have any questions please call Erik Kraft at 703-308-9358 or email at Kraft Erik@epa.gov.

75 SG herbicide

Active Ingredient: imazapyr: (2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1/H-imidazol-2-yl]-3-pyridinecarboxylic acid) Other Ingredients: Total:

EPA Reg. No. 241-387

EPA Est. No

KEEP OUT OF REACH OF CHILDREN CAUTION/PRECAUCIÓN

FIRST AID		
lf on skin	 Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice. 	
If in eyes	 Hold eyes open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after first 5 minutes; then continue rinsing eyes. Call a poison control center or doctor for treatment advice. 	
If inhaled	 Move person to fresh air. If person is not breathing, call 911 or an ambulance; then give artificial respiration, preferably by mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice. 	
	HOT LINE NUMBER	

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact BASF Corporation for emergency medical treatment information 1-800-832-HELP (4357).

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

Personal Protective Equipment (PPE)

Some materials that are chemical resistant to this product are barrier laminate, butyl rubber, or polyethylene. If you want more options, follow the instructions for **Category A** on an EPA chemical-resistance category selection chart.

Mixers, loaders, applicators, and other handlers must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks
- Chemical-resistant gloves for all mixers and loaders, plus applicators using handheld equipment

Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. **DO NOT** reuse them.

Engineering Controls

Pilots must use an enclosed cockpit that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(6)].

USER SAFETY RECOMMENDATIONS

Users should:

- Wash hands with plenty of soap and water before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product.
 Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is toxic to plants. Drift and runoff may be hazardous to plants in water adjacent to treated areas. **DO NOT** apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. **DO NOT** contaminate water when disposing of equipment washwater or rinsate. See **DIRECTIONS FOR USE** for additional precautions and requirements.

PHYSICAL AND CHEMICAL HAZARDS

Spray solutions of **Arsenal® 75 SG herbicide** should be mixed, stored, and applied only in stainless steel, tiber-glass, plastic, and plastic-lined steel containers.

DO NOT mix, store, or apply Arsenal 353SG or spray solutions of Arsenal 75 SG in unlined steal (except stainless steel) containers or spray tanks, and a standard steal of the stainless steel) containers or spray tanks, and a standard steal of the stainless steel of the statement of the statemen

IMPORTANT

000 000

DO NOT use on food or feed crops? **DO NOT** treat inigation ditches, or water used for crop initigation or for domestic uses. Keep from contact with fertilizers, insecticides, " fungicides and seeds. **DO NOT** apply except as recome mended or drain or flush equipment on or near desigable" trees or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. **DO NOT** use on lawns, walks, driveways, tennis courts, or similar areas. **DO NOT** side trim desirable vegetation with this product.

Prevent drift of spray to desirable plants. **DO NOT USE** in California.

Clean application equipment after using this product by thoroughly flushing with water.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Arsenal® 75 SG herbicide should be used only in accordance with recommendations on the leaflet label attached to the container. Keep containers closed to avoid spills and contamination.

For maintenance of noncropland sites described above, **Arsenal 75 SG** may be applied to nonirrigation ditches and low-lying areas when water has drained but may be isolated in pockets due to uneven or unlevel conditions.

DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

NONAGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Noncrop weed control is not within the scope of the Worker Protection Standard. See the **GENERAL INFORMATION** section of this label for a description of

noncrop sites.

DO NOT enter or allow others to enter treated areas until sprays have dried.

STORAGE AND DISPOSAL

DO NOT contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE. Store in original container and keep closed. Store in a cool, dry place.

PESTICIDE DISPOSAL. Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER DISPOSAL

(for plastic containers)

Nonrefillable Container. DO NOT reuse or refill this container. After completely emptying container into application equipment, offer for recycling, if available, or reconditioning, if appropriate, or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

(for paper or plastic bags)

Nonrefillable Container. DO NOT reuse or refill this

container. After completely emptying container into application equipment, dispose of empty bag in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

IN CASE OF SPILL

In case of large-scale spillage regarding this product, call: CHEMTREC 1-800-424-9300 BASF Corporation 1-800-832-HELP (4357)

GENERAL INFORMATION

Arsenal 75 SG is a soluble granule to be mixed with water and a surfactant and applied as a spray solution to noncropland areas such as railroad, utility, pipeline and highway rights-of-way, utility plant sites, petroleum tank farms, pumping installations, fence rows, storage areas, nonirrigation ditchbanks, and other similar areas.

Arsenal 75 SG is recommended for the establishment and maintenance of wildlife openings. **Arsenal 75 SG** may also be used for the release of unimproved bermudagrass (see specific directions) and for use under certain paved surfaces (see specific directions).

Arsenal 75 SG will control most annual and perennial grasses and broadleaf weeds in addition to many brush and vine species and Arsenal 75 SG will provide residual control of labeled weeds which germinate in the treated areas. This product may be applied either preemergence or postemergence to the weeds; however, postemergence application is the method of choice in most situations, particularly for perennial species. For maximum activity, weeds should be arowing vigorously at the time of postemergence application and the spray solution should include a surfactant (See ADJUVANTS section for specific recommendations). These solutions may be applied selectively by using low-volume techniques or may be applied broadcast by using ground equipment or aerial equipment. In addition, Arsenal 75 SG may also be used for stump and cut stem treatments (see specific directions).

Arsenal 75 SG is readily absorbed through leaves, stems, and roots and is translocated rapidly throughout the blant, with accumulation in the meristematic regions. Treated plants stop growing soon after spray application, Chlorosis appears first in the newest leaves, and recrosis spreads from this point. In perennials, the horbicide is translocated into, and kills, underground storage organs which prevents regrowth. Chlorosis and tissue necrosis may not be apparent in some plant species until two weeks after application. Complete kill of plants may not occur the soveral weeks. Applications of **Arsenal 75 SG** are rainast one hour after treatment.

ADJUVANTS

0000 0000 0000

Postemergence applications of Arsenal 75 SG require a spray adjuvant.

Nonionic Surfactants: Use a nonionic surfactant at the rate 0.25% volume/volume (v/v) or higher (see manufacturer's label) of the spray solution (0.25% v/v is equivalent to 1 quart in 100 gallons). For best results, select a nonionic

surfactant with an HLB (hydrophilic to lipophilic balance) ratio between 12 and 17 with at least 60% surfactant in the formulated product (alcohols, fatty acids, oils, ethylene glycol or diethylene alvcol should not be considered as surfactants to meet the above requirements).

Methylated Seed Oils or Vegetable Oil Concentrates:

Instead of a surfactant, a vegetable-based seed oil concentrate may be used at the rate of 1.5 to 2 pints per acre. Research indicates that these oils may aid in the deposition and uptake of Arsenal® 75 SG herbicide under moisture or temperature stress.

Silicone-based Surfactants: See manufacturer's label for specific rate recommendations. Silicone-based surfactants may reduce the surface tension of the spray droplet allowing greater spreading on the leaf surface than conventional nonionic surfactants. However, some silicone-based surfactants may dry too guickly, limiting herbicide uptake.

Fertilizer/Surfactant Blends: Nitrogen-based liquid fertilizers such as 28%N, 32%N, 10-34-0, or ammonium sulfate, may be added at the rate of 2 to 3 pints per acre in combination with the recommended rate of nonionic surfactant or vegetable/seed oil concentrate. The use of fertilizers in a tank mix without a nonionic surfactant is not recommended.

Spray Drift Requirements

Aerial Applications

- Applicators are required to use a coarse or coarser droplet size (ASABE S572) or, if specifically using a spinning atomizer nozzle, applicators are required to use a volume mean diameter (VMD) of 385 microns or greater for release heights below 10 feet. Applicators are required to use a very coarse or coarser droplet size or, if specifically using a spinning atomizer nozzle, applicators are required to use a VMD of 475 microns or greater for
- release heights above 10 feet. Applicators must consider the effects of nozzle orientation and flight speed when determining droplet size.
- Applicators are required to use upwind swath displacement.
- The boom length must not exceed 60% of the wingspan or 90% of the rotor blade diameter to reduce spray drift.
- Applications with wind speeds less than 3 mph and with wind speeds greater than 10 mph are prohibited.
- Applications into temperature inversions are prohibited.

Ground Boom Applications

- · Applicators are required to use a nozzle height below 4 feet above the ground or plant canopy and coarse or coarser droplet size (ASABE S572) or, if specifically using a spinning atomizer nozzle, applicators are required to use a volume mean diameter (VMD) of 385 microns or greater.
- Applications with wind speeds greater than 10 mph are prohibited.
- Applications into temperature inversions are prohibited.

BRUSH CONTROL

AERIAL APPLICATIONS

All precautions should be taken to minimize or eliminate spray drift. Fixed-wing aircraft and helicopters can be used to apply Arsenal 75 SG. However, DO NOT make applications by fixed-wing aircraft unless appropriate buffer zones can be maintained to prevent spray drift out of the target area or, when treating open tracts of land, spray drift as a result of fixed-wing aircraft application can be tolerated. Aerial equipment designed to minimize spray drift, such as a helicopter equipped with a Microfoil® boom, Thru-Valve® boom or raindrop nozzles, must be used and calibrated. Except when applying with a Microfoil boom, a drift control agent may be added at the recommended label rate. To avoid drift, applications should not be made during inversion conditions, when winds are gusty, or any other conditions which allow drift. Side trimming is not recommended with Arsenal 75 SG unless death of treated tree can be tolerated.

Uniformly apply the recommended amount of Arsenal 75 SG in 5 to 30 gallons of water per acre; include in the spray solution a nonionic surfactant or methylated seed oil or manufacturer's label rate of a silicone-based surfactant (See the ADJUVANTS section of this label for specific recommendations). A foam-reducing agent may be added at the recommended label rate, if needed.

IMPORTANT: Thoroughly clean application equipment, including landing gear, immediately after use of this product. Prolonged exposure of this product to uncoated steel (except stainless steel) surfaces may result in corrosion and failure of the exposed part. The maintenance of an organic coating (paint) may prevent corrosion.

GROUND APPLICATIONS

IMPORTANT: To minimize spray drift, select proper nozzles to avoid spraying a fine mist, use pressures less than 50 psi, and do not spray under gusty or windy conditions. Add a foam-reducing agent, if needed, and a spray pattern indicator, if desired, at the recommended label rates. Clean application equipment after using this product by theroughly flushing with water.

When making applications to rights-of-way corridors where desirable tree roots may extend, use 0.3 to 1.0 pound of Arsenal 75 SG per acre in combination with recommended tank mixes. It is not recommended to use rates higher than 1.0 pound per acre in these situations as injury or . death of desirable trees may occur when their roots extend ວັວບັງວິ ວ່ວບັງວິ into treated zones. ، ۵۵<u>دد</u> ۵٫٫٫۵۵

Side Trimming

DO NOT side trim with Arsenal 75 SG unless severe injury or death of the treated tree can be tolerated. Arsenal 75 SG is readily translocated and can result in death of the entire tree.

Low Volume

Use equipment calibrated to deliver 5 to 20 gallons of spray solution per acre. To prepare the spray solution, thoroughly mix in water a sufficient quantity of

Arsenal® 75 SG herbicide to apply 0.25 to 0.50 pound of Arsenal 75 SG per acre, plus a recommended surfactant (See the ADJUVANTS section of this label for specific recommendations). A foam-reducing agent may be applied at the recommended label rate, if needed. For control of difficult brush species (see WEEDS CONTROLLED section for relative susceptibility of weed species), use the higher concentrations of herbicide and/or spray volumes but DO NOT apply more than 2.0 pounds of Arsenal 75 SG per acre. Excessive wetting of foliage is not recommended.

SUGGESTED TANK MIXES AND APPLICATION RATES*

Target Vegetation	Arsenal 75 SG Rate (pound/acre)	Tank Mix
Mixed hardwoods without elm, locust, or pine	0.33 to 0.50	Surfactant
Mixed hardwoods containing elm, locust, and pine	0.25 to 0.33	Accord® at 2 to 3% by volume plus surfactant
Mixed hardwoods with locust and pine but no elm	0.25 to 0.33	Krenite® at 2 to 5% by volume plus surfactant
Mixed hard- woods with locust and elm but no pine	0.25 to 0.33	Escort® at 2 ozs/Acre or 2.3 grams/gal plus surfactant

*Tank mixes with 2,4-D or products containing 2,4-D have resulted in reduced efficacy of **Arsenal 75 SG**.

MEASURING CHART

A 1.33 pound water-soluble package of **Arsenal 75 SG** contains 1.0 pound acid equivalent of imazapyr.

Application Tips: For low volume, select proper nozzles to avoid overapplication. Proper application is critical to ensure desirable results. Best results are achieved when the spray covers the crown and approximately 70 percent of the plant. The use of an even flat fan tip with a spray angle of 40 degrees or less will aid in proper deposition.

Recommended tip sizes include 4004E or 1504E. For a straight stream and cone pattern, adjustable cone nozzles such as 5500 X3 or 5500 X4 may be used. Attaching a rollover valve onto a Spraying Systems Model 30 gunjet or other similar spray guns allows for the use of both a flat fan and cone tips on the same gun.

Proper Spray Pattern: Moisten, but do not drench target vegetation causing spray solution to run off.

Low Volume with Backpacks

For brush up to 4 feet tall, spray down on the crown, covering crown and penetrating approximately 70% of the plant.

For brush 4 to 8 feet tall, swipe the sides of target vegetation by directing spray to at least two sides of the plant in smooth vertical motions from the crown to the bottom. Make sure to cover the crown whenever possible.

For brush over 8 feet tall, spray at least two sides of the target brush in smooth zigzag motions from crown to bottom.

Low Volume with Hydraulic Handgun Application Equipment

Use same technique as described above for individual stem treatments.

For broadcast applications, simulate a gentle rain near the top of target vegetation, allowing spray to contact the crown and penetrate the target foliage without falling to the understory. Herbicide spray solution which contacts the understory may result in severe injury or death of plants in the understory.

Arsenal 75 SG SPRAY SOLUTION MIXING GUIDE

High Volumes

For optimum performance when spraying medium to high density brush, use equipment calibrated to deliver up to 100 gallons of spray solution per acre (GPA). Spray solutions exceeding 100 GPA may result in excessive spray runoff, causing increased ground cover injury, and injury to desirable species. To prepare the spray solution, thoroughly mix Arsenal[®] 75 SG herbicide at a rate of 0.7 to 2.0 pounds per acre (see IMPORTANT section under **GROUND APPLICATIONS)** in water and add a surfactant (See ADJUVANTS section for specific recommendations and rates of surfactants). A foam-reducing agent may be added at the recommended label rate, if needed. For control of difficult species (see WEEDS CONTROLLED section for relative susceptibility of weed species), use the higher concentrations of herbicide and/or spray volumes but DO NOT apply more than 2 pounds of Arsenal 75 SG per acre. Uniformly cover the foliage of the vegetation to be controlled but **DO NOT** apply to runoff. Excessive wetting of foliage is not recommended.

TANK MIXES FOR BRUSH CONTROL

Arsenal 75 SG may be tank mixed with Accord[®], Roundup[®], Krenite[®], Escort[®], Telar[®], Tordon[®] K, Garlon[®] 3A, Banvel[®], and Vanquish[®] to provide control of Arsenal 75 SG tolerant species.

Consult manufacturer's labels for specific rates and weeds controlled. Always follow the more restrictive label when making an application involving tank mixes. Tank mixing with 2,4-D or products which contain 2,4-D have resulted in reduced performance of **Arsenal 75 SG**.

CUT STUBBLE

Arsenal 75 SG can be applied within 2 weeks after mechanical mowing or cutting of brush. To suppress or control resprouting, uniformly apply a spray solution of **Arsenal 75 SG** at the rate of 0.3 to 0.7 pounds per acre to the cut area. **Arsenal 75 SG** may be tank mixed with **Tordon K** to aid in control or suppression of brush. The addition of 5% (v/v) or more of a penetrating agent can aid in uptake through the bark or exposed roots.

Cut stubble applications are made to the soil and cut brush stumps. This type of application may increase ground cover injury. However, vegetation will recover. Making applications of **Arsenal 75 SG** directly to the soil can increase potential root uptake causing injury or death of desirable trees.

Efficacy can be increased and root uptake by desirable vegetation can be decreased if the brush is allowed to regrow and the foliage is treated. See the **BRUSH CONTROL** section of this label.

STUMP AND CUT STEM TREATMENTS

Arsenal 75 SG may be used to control undesirable woody vegetation on noncropland by applying the **Arsenal 75 SG** solution to the cambium area of freshly cut stump surfaces or to fresh cuts on the stem of the target woody vegetation. Applications can be made at any time of the year except during periods of heavy sap flow in the spring.

DO NOT overapply solution causing runoff or puddling.

Mixing: Arsenal 75 SG may be mixed as either a concentrated or dilute solution for stump and cut stem treatments. The dilute solution may be used for applications to the surface of the stump or to cuts on the stem of the target woody vegetation. Concentrated solutions may be used for applications to cuts on the stem. Use of the concentrated solution permits application to fewer cuts on the stem, especially for large diameter trees. Follow the application instructions to determine proper application techniques for each type of solution.

To prepare a dilute solution, mix 1.33 pounds **Arsenal 75 SG** (one water-soluble package) with 4 to 8 gallons of water. If temperatures are such that freezing of the spray mixture may occur, antifreeze (ethylene glycol) may be used according to manufacturer's label to prevent freezing. The use of a surfactant or penetrating agent may improve uptake through partially callused cambiums. To prepare a concentrated solution, mix 1.33 pounds of **Arsenal 75 SG** with no more than 1 quart of water and **agitate well**.

APPLICATION WITH DILUTE SOLUTIONS

For cut stump treatments: Spray or brush the solution onto the cambium area of the freshly cut stump surface. Ensure that the solution thoroughly wets the entire cambium area (the wood next to the bark of the stump).

For tree injection treatments: Using standard injection equipment, apply 1 milliliter of solution at each injection site around the tree with no more than one-inch intervals between cut edges. Ensure that the injector completely penetrates the bark at each injection site.

For frill or girdle treatments: Using a hatchet, machete, or similar device, make cuts through the bark at intervals around the tree with no more than two-inch intervals between cut edges. Spray or brush the solution into each cut until thoroughly wet.

APPLICATION WITH CONCENTRATED SOLUTIONS

For tree injection treatments: Using standard injection equipment, apply 1 milliliter (1/5 teaspoon) of solution at each injection site. Make at least one injection cut for every 3 inches of diameter at breast height (DBH) on the target tree. For example, a 3-inch DBH tree will receive 1 injection cut and a 6-inch DBH tree will receive 2 injection cuts 30 m trees requiring more than one injection site, place the injection cuts at approximately equal intervals around the tree.

For frill or girdle treatments: Using a hashet, machete, or similar device, make cuts through the bark at approximately equal intervals around the tree. Make at least one cut for every 3 inches of DBH on the target tree. For example, a 3-inch DBH tree will receive 1 cut and a 6-inch DBH tree will receive 2 cuts. Spray or brush the solution into each cut until thoroughly wet.

NOTE: Injury may occur to desirable woody plants if the shoots extend from the same root system or their root systems are grafted to those of the treated tree.

FOR CONTROL OF UNDESIRABLE WEEDS UNDER PAVED SURFACES

Arsenal® 75 SG herbicide can be used under asphalt, pond liners and other paved areas, ONLY in industrial sites or where the pavement has a suitable barrier along the perimeter that prevents encroachment of roots of desirable plants.

Arsenal 75 SG should be used only where the area to be treated has been prepared according to good construction practices. If rhizomes, stolons, tubers or other vegetative plant parts are present in the site, they should be removed by scalping with a grader blade to a depth sufficient to ensure their complete removal.

IMPORTANT: Paving should follow Arsenal 75 SG applications as soon as possible. DO NOT apply where the chemical may contact the roots of desirable trees or other plants.

The product is not recommended for use under pavement on residential properties such as driveways or parking lots, nor is it recommended for use in recreational areas such as under bike or jogging paths, golf cart paths, or tennis courts, or where landscape plantings could be anticipated.

Injury or death of desirable plants may result if this product is applied where roots are present or where they may extend into the treated area. Roots of trees and shrubs may extend a considerable distance beyond the branch extremities or drip line.

APPLICATION DIRECTIONS FOR PAVED SURFACES

Applications should be made to the soil surface only when final grade is established. DO NOT move soil following Arsenal 75 SG application.

Apply Arsenal 75 SG in sufficient water (at least 100 gals per acre) to ensure thorough and uniform wetting of the soil surface, including the shoulder areas. Add Arsenal 75 SG at a rate of 2.0 pounds per acre to clean water in the spray tank during the filling operation. Agitate before spraying.

If the soil is not moist prior to treatment, incorporation of Arsenal 75 SG is needed for herbicide activation. Arsenal 75 SG can be incorporated into the soil to a depth of 4 to 6 inches using a rototiller or disc. Rainfall or irrigation of 1 inch will also provide uniform incorporation. DO NOT allow treated soil to wash or move into untreated areas.

FOR CONTROL OF UNDESIRABLE WEEDS IN UNIMPROVED BERMUDAGRASS AND BAHIAGRASS

Arsenal 75 SG may be used on unimproved bermudagrass and bahiagrass turf such as roadsides, utility rightsof-way and other noncropland industrial sites. The application of Arsenal 75 SG on established common and coastal bermudagrass and bahiagrass provides control of labeled broadleaf and grass weeds. Competition from these weeds is eliminated, releasing the bermudagrass and bahiagrass. Treatment of bermudagrass with Arsenal 75 SG results in a compacted growth habit and seedhead inhibition.

Uniformly apply with properly calibrated ground equipment using at least 10 gallons of water per acre with a spray pressure of 20 to 50 psi.

IMPORTANT: Temporary yellowing of grass may occur when treatment is made after growth commences. DO NOT add surfactant in excess of the recommended rate (1 oz per 25 gallons of spray solution). **DO NOT APPLY** to grass during its first growing season. DO NOT APPLY to grass that is under stress from drought, disease, insects, or other causes.

DOSAGE RATES AND TIMING

Bermudagrass. Apply Arsenal 75 SG at 0.125 to 0.33 pound per acre when the bermudagrass is dormant. Apply Arsenal 75 SG at 0.125 to 0.17 pound per acre after the bermudagrass has initiated greenup. Include in the spray solution a surfactant (see preceding IMPORTANT statement).

For additional preemergence control of annual grasses and small seeded broadleaf weeds, add

Pendulum[®] AguaCap[™] herbicide at the rate of 2.1 to 4.2 gts per acre. Consult the Pendulum label for weeds controlled and for other use directions and precautions.

For control of Johnsongrass in bermudagrass turf, apply Arsenal 75 SG at 0.17 pound per acre plus Roundup® at 12 ozs per acre plus surfactant. For additional control of broadleaves and vines, Garlon® 3A may be added to the above mix at the rate of 1 to 2 pints per acre. Observe all precautions and restrictions on the Garlon 3A and Roundup labels.

Bahiagrass. Apply Arsenal 75 SG at 0.8 to 0.17 pound per acre when the bahiagrass is dormant or after the grass has initiated greenup but has not exceeded 25% greenup. Include in the spray solution a surfactant (See **ADJUVANTS** section for specific recommendations on surfactants).

GRASS GROWTH AND	

GRASS GROWTH AND SEEDHEAD SUPPRESSION

ູ່ບໍລູລູ ບໍລິດ

Arsenal 75 SG may be used to suppress growth and seedhead development of certain turfgrass in unimproved areas. When applied to desirable turf, Arsenal 75 SG may result in temporary turf damage and/or discoloration. Effects to the desirable turf may vary with environmental conditions. For optimum performance, application should be made prior to culm elongation. Applications may be

made before or after mowing. If applied prior to mowing, allow at least three days of active growth before mowing. If following a mowing, allow sufficient time for the grasses to recover before applying this product or injury may be amplified.

DO NOT APPLY to turf under stress (drought, cold, insect damaged, etc.) or severe injury or death may occur.

Bermudagrass. Apply **Arsenal® 75 SG herbicide** at 0.125 to 0.17 pound per acre from early greenup to prior to seedhead initiation. **DO NOT** add a surfactant for this application.

Cool Season Unimproved Turf. Apply **Arsenal 75 SG** at 0.04 pound per acre plus 0.25% nonionic surfactant. For increased suppression, **Arsenal 75 SG** may be tank mixed with such products as **Campaign®** (24 ozs per acre) or **Embark®** (8 ozs per acre). Tank mixes may increase injury to desired turf. Consult each product label for recommended turf species and other use directions and precautions. Tank mixes with 2,4-D or products containing 2,4-D may decrease the effectiveness of **Arsenal 75 SG**.

TOTAL VEGETATION CONTROL WHERE BAREGROUND IS DESIRED

Arsenal 75 SG is an effective herbicide for preemergence and postemergence control of many annual and perennial broadleaf and grass weeds where bareground is desired. Arsenal 75 SG is particularly effective on hard-to-control perennial grasses. Arsenal 75 SG can be used alone or in tank mix with Roundup[®], Finale[®], diuron, Karmex[®], Pendulum[®], simazine, Banvel[®], Vanquish[®], or Oust[®] herbicides. The degree and duration of control are dependent on the rate of Arsenal 75 SG used, tank mix partner, the volume of carrier, soil texture, rainfall and other conditions. See the table below for rates in your specific region.

Consult manufacturer's labels for specific rates and weeds controlled. Always follow the more restrictive label when making an application involving tank mixes.

TANK MIX RECOMMENDATIONS FOR BAREGROUND

Herbicide Rates per Acre*				
ArsenalPendulum®Pendulum®75 SGAquaCap™3.3 ECdi(pounds)(quarts)(lic)				
0.5 to 1.0	4.2	4.8	4 to 6	
0.7 to 1.3	4.2	4.8	6 to 10	
1.0 to 2.0	4.2	4.8	8 to 12	

* Use higher rates for fall applications and in areas that have not been previously treated or that feature heavy infestations.

Applications of **Arsenal 75 SG** may be made anytime of the year. Use equipment calibrated to deliver desired gallons per acre spray volume and uniformly distribute the spray pattern over the treated area.

Postemergence Applications: Always use a spray adjuvant (see ADJUVANTS section of this label) when making

a postemergence application. For optimum performance on tough-to-control annual grasses, applications should be made at a total volume of 100 gallons per acre **or less**. For quicker burndown or brown-out of target weeds, **Arsenal 75 SG** may be tank mixed with products such as **Roundup** or **Finale**. Tank mixes with 2,4-D or products containing 2,4-D have reduced performance of **Arsenal 75 SG**. Always follow the more restrictive label when tank mixing.

Spot Treatments: Arsenal 75 SG may be used as a followup treatment to control escapes or weed encroachment in a bareground situation. To prepare the spray solution, thoroughly mix in water sufficient quantity of Arsenal 75 SG to apply 0.25 to 0.50 pound of Arsenal 75 SG per acre, plus a recommended surfactant (See the ADJUVANTS section of this label for specific recommendations). For increased burndown, include Roundup, Finale, or similar products. For added residual weed control or to increase the weed spectrum, add Pendulum or diuron. Always follow the more restrictive label when tank mixing.

WEEDS CONTROLLED

Arsenal 75 SG will provide preemergence or postemergence control with residual control of the following target vegetation species at the rates listed. Residual control refers to control of newly germinating seedlings in both annuals and perennials. In general, annual weeds may be controlled by preemergence or postemergence applications of Arsenal 75 SG. For established biennials and perennials, postemergence applications of Arsenal 75 SG are recommended. The rates shown below pertain to broadcast applications and indicate the relative sensitivity of these weeds. The relative sensitivity should be referenced when preparing low-volume spray solutions (see Low Volume section of GROUND APPLICATIONS); low-volume applications may provide control of the target species with less Arsenal 75 SG per acre than is shown for the broadcast treatments. Arsenal 75 SG should be used only in accordance with the recommendations on this label and the leaflet label.

Conditions of Sale and Warrantv

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW. BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR **IMPLIED WARRANTY.**

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER'S EXCLUSIVE REMEDY AND BASF'S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR **OTHERWISE, SHALL BE LIMITED TO REPAYMENT** OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF. 1108
