#### RE: Pendulum<sup>®</sup> 1.15% Plus Fertilizer (EPA Reg. No. 241-422) Label Notification

Dear Mr. Davis:

BASF is hereby submitting a label notification for Pendulum 1.15% Plus Fertilizer (241-422) in response to your email from March 14, 2013 deleting the following inappropriate statement from page 18.

**Pendulum 1.15% Plus Fertilizer** may be used on plant species not listed on this label. The suitability for such uses should be determined by treating a small number of such plants at the specified rate. Treated plants should be evaluated 1-2 months following treatment for possible injury. TO THE FULLEST EXTENT PERMITTED BY LAW, THE USER ASSUMES RESPONSIBILITY FOR ANY CROP DAMAGE OR OTHER LIABILITY.

Enclosed please find:

- Application form 8570-1
- Email dated March 14, 2013
- Pendulum 1.15% Plus Fertilizer label.

No PRIA fee is required for this notification.

Thank you for your assistance with this matter. If you should have any questions, please feel free to call me at (919) 547-2622.

Regards 100

Jeffrey H. Birk, Ph.D. Regulatory Manager Phone 919-547-2622 Fax: 919-547-2850 Email: jeffrey.birk@basf.com

#### **Environmental Hazards**

This product is toxic to fish. **DO NOT** apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. **DO NOT** contaminate water when disposing of equipment washwaters or rinsate.

#### For Florida Only:

- DO NOT apply near water, storm drains or drainage ditches.
- DO NOT apply if heavy rain is expected.
- Apply only to lawn, and sweep any product that lands on the driveway, sidewalk or street, back onto lawn.

### **Directions For Use**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This label must be in the possession of the user at time of pesticide application.

BASF Corporation does not recommend or authorize the use of this product in manufacturing, processing or preparing custom blends with other products for application to turf or ornamentals.

**DO NOT** apply **Pendulum<sup>®</sup> 1.15% Plus Fertilizer** in greenhouses, shadehouses or other enclosed structures.

NOT FOR USE on grass grown for commercial seed production.

**DO NOT** apply this product through any irrigation system. Keep children and pets out of treated area until dust has settled.

**DO NOT** allow dust to drift from the application site and contact people, structures people occupy at any time and the associated property, parks and recreation areas, nontarget crops, aquatic and wetland areas, woodlands, pasture, rangeland, or animals.

**DO NOT** apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

#### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

DO NOT enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

#### NONAGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

DO NOT enter or allow others to enter the treated area until dusts have settled.

# FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR WEED CONTROL, CROP INJURY, OR RESIDUES.

#### STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal.

#### Pesticide Storage

DO NOT store above 120° F. Store in original container and keep closed. Store in a cool, dry place.

#### Pesticide Disposal

Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

#### **Container Handling**

#### (for paper or plastic bags)

Nonrefillable Container. DO NOT reuse or refill this container. After completely emptying container into application equipment, dispose of empty bag in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

Observe all cautions and limitations on this label and the labels of products used in combination with **Pendulum® 1.15% Plus Fertilizer**. The use of **Pendulum 1.15% Plus Fertilizer** not consistent with this label can result in injury to crops, animals, or persons. Keep containers closed to avoid spills and contamination.

#### **Product Information**

**Pendulum 1.15% Plus Fertilizer** is a combination preemergence herbicide and fertilizer formulated to provide control of most annual grasses and certain broadleaf weeds found in any turfgrass site (lawns, sod, turf areas). Examples of such sites include, but are not limited to: golf courses, lawns in residential, commercial establishments, or grounds around military or other institutions, parks, airports, roadsides, schools or cemeteries; athletic fields or recreational areas; prairiegrass areas; and sod farms. **Pendulum 1.15% Plus Fertilizer** can be used around established ornamentals in the landscape and in established wildflower plantings. **Pendulum 1.15% Plus Fertilizer** may be used for hardwood and conifer regeneration on conservation reserve program land or similar areas.

Pendulum 1.15% Plus Fertilizer is labeled for use on the following turfgrass species: Kentucky bluegrass, perennial ryegrass, fine fescue, tall fescue, bentgrass, *Poa annua* (except putting, greens and tees), Bermudagrass, St. Augustinegrass, Bahiagrass, centipedegrass, zoysiagrass, and blends of these grasses.

Pendulum 1.15% Plus Fertilizer controls weeds as they germinate but will not control established weeds. Therefore, areas to be treated should be free of established weeds. Unusually cold, excessively wet, or hot and dry conditions that delay germination or extend germination over a long period of time can reduce weed control.

#### **Application Instructions**

Apply product uniformly at the specified rate using a properly calibrated spreader. The efficacy of **Pendulum**<sup>®</sup> **1.15% Plus Fertilizer** will be improved if the application is followed by 1/2 inch of rainfall or its equivalent in sprinkler irrigation. This will remove the product from the turfgrass foliage and establish a preemergence herbicide barrier in the soil. If **Pendulum 1.15% Plus Fertilizer** is not activated by rainfall or irrigation within 30 days, erratic weed control may result.

Avoid contact of product with porous surfaces such as driveways, stone, or wood. Removing particles will help prevent staining.

**Pendulum 1.15% Plus Fertilizer** can be applied before or after postemergence herbicides used to control emerged weeds in turfgrasses. For annual grass control, applications can be made with **Segment<sup>®</sup> herbicide**, **Acclaim Extra<sup>®</sup> herbicide**, or MSMA-containing products to control emerged weeds. Broadleaf weeds can be controlled using **Trimec<sup>®</sup> herbicide**; **Three-Way<sup>™</sup> herbicide**; 2,4-D; and other similar products.

Applied according to label directions and under normal growing conditions, **Pendulum 1.15% Plus Fertilizer** will not cause injury to desirable plants. Overapplication can result in stand loss, plant injury, or soil residues. Uneven application can decrease weed control or cause plant injury.

Seedling diseases, cold weather, excessive moisture, high soil pH, high soil salt concentration, or drought can weaken seedlings and plants and increase the possibility of plant damage from **Pendulum 1.15% Plus Fertilizer**.

Apply with properly calibrated spreader equipment to provide uniform distribution. Check application routinely to determine proper calibration. Avoid overlaps that will increase rates above those specified. Avoid application when winds may cause drift.

#### Florida Specific Requirements for Fertilizer Use

#### For applications to sports turf at golf courses, parks and athletic fields:

**DO NOT** exceed fertilizer rates recommended in the document titled SL 191, "Recommendations for N, P, K and Mg for Golf Course and Athletic Field Fertilization Based on Mehlich I Extractant" dated control March 2007. Copies may be downloaded from http://edi.ifas.ufl.edu/SS404.

Follow "Best Management Practices for the Enhancement of Environmental Quality on Florida Golf Courses," published by the Florida Department of Environmental Protection, dated January 2007. Copies, may be downloaded from http://www.dep.state.fl.us/water/nonpoint/pubs.htm.

#### For all fertilizer uses other than as a specialty fertilizer on urban turf:

**DO NOT** exceed rates recommended in the document titled Best Management Practices for Protection of Water Resources in Florida, June 2002, Florida Green Industries. This document may be downloaded from http://www.dep.state.fl.us/water/nonpoint/docs/nonpoint/BMP Book.

#### Weeds Controlled

**Pendulum<sup>®</sup> 1.15% Plus Fertilizer** provides preemergence control of weed species listed. Applications can be made around and over the top of ornamentals and to sites listed on this label.

<sup>1</sup> DO NOT exceed a maximum rate of 174 pounds per acre per application for use on residential turfgrass and sod farm turfgrass.

#### **Turfgrass Precautions**

Use on well-established turfgrass with a dense and uniform stand. On newly planted areas, application should not be made until turfgrass has filled in and been mowed at least 4 times. On turf thinned or damaged because of winter injury, excessive moisture, etc., allow for turf recovery before making an application.

Applications made to overseeded warm-season turfgrass may cause thinning or injury of the overseeded species.

DO NOT use on bentgrass or Poa annua greens and tees or injury may occur.

Delay reseeding or winter overseeding of treated turfgrass for at least three (3) months following the last **Pendulum**<sup>®</sup> **1.15% Plus Fertilizer** application. Delay sprigging turfgrass for five (5) months after application.

#### Industrial (Unimproved) Turf

Industrial or unimproved turf areas often have a different spectrum of weeds to control than those found in fine turf. **Pendulum 1.15% Plus Fertilizer** will control annual grasses and broadleaf weeds listed for cool-season and warm-season grass, and the following weeds that might germinate in established grass in rights-of-way, roadsides, construction sites, parks, substations, lots, or similar areas:

crowfootgrass, itchgrass, Johnsongrass (from seed), junglerice, lovegrass (from seed), browntop panicum, Texas panicum, field sandbur, signalgrass, Mexican sprangletop, red sprangletop, witchgrass, woolly cupgrass, carpetweed, fiddleneck, filaree, kochia, lambsquarters, pigweed, puncturevine, Florida pusley, London rocket, shepherdspurse, Pennsylvania smartweed, annual spurge, and velvetleaf.

**Apply before weeds germinate**. Use a postemergence herbicide such as 2,4-D; MCPA; MSMA; or similar product to control established weeds.

Landscape and Grounds Maintenance

**Pendulum 1.15% Plus Fertilizer** can be incorporated into landscape and grounds maintenance programs to provide extended preemergence control of most annual grasses and certain broadleaf weeds. Areas to be treated include but are not limited to established trees or ornamentals in the landscape or in mulch beds; or other commercially maintained landscape areas such as borders, around statuary or monuments in parks or in parking areas. If emerged weeds are present at time of application, either **shallow** cultivate to destroy existing weeds or, where practical, remove by hand or apply a postemergence product labeled for such use before an application of **Pendulum 1.15% Plus Fertilizer**. **Pendulum 1.15% Plus Fertilizer** may be used before or after application of herbicides registered for postemergence use (i.e. **Segment<sup>®</sup> herbicide**, **Roundup PRO<sup>®</sup> herbicide** or **Finale<sup>®</sup> herbicide**) for the control of established weeds.

**DO NOT** apply sprays containing **Roundup<sup>®</sup> herbicide** or **Finale** over the top of desirable plants, and follow label restrictions. A **Pendulum 1.15% Plus Fertilizer** treatment may be followed by any registered herbicide to control weeds not listed on the **Pendulum 1.15% Plus Fertilizer** label.

#### **Ornamental Bulbs**

Pendulum 1.15% Plus Fertilizer may be applied for control of susceptible annual weeds in ornamental bulbs listed on the label (crocus, daffodil (narcissus), gladiolus, tulip, etc.). Apply Pendulum 1.15% Plus Fertilizer before, during or after bulb emergence. If weeds have already germinated, use a labeled cocce postemergence herbicide to control emerged weeds.

#### Wildflowers

**Pendulum 1.15% Plus Fertilizer** may be applied for control of susceptible annual weeds in plantif<u>es</u> <u>of</u> wildflowers listed on the label (black-eyed Susan, California poppy, coreopsis, oxeye daisy, etc.). **Pendulum 1.15% Plus Fertilizer** may be applied to established perennial wildflowers before emergénce of weeds or wildflowers. For wildflowers being established from seed, apply **Pendulum 1.15% Plus Fertilizer** after wildflowers have emerged but before weed germination. If weeds have already germinated, use a labeled postemergence product to control emerged weeds. Because of the diversity of species and varieties which exist in areas where wildflowers are grown, the response to **Pendulum® 1.15% Plus Fertilizer** may vary greatly. Carefully test desirable species to determine if area-wide applications can be made.

#### **Ornamental Precautions**

Apply **Pendulum 1.15% Plus Fertilizer** to established plantings. Care must be taken that soil or planting mixes have settled firmly following transplanting and that there are no cracks that would allow direct contact of **Pendulum 1.15% Plus Fertilizer** with roots. Applications where soil and media surfaces are uniformly covered will result in best weed control and ornamental tolerance. Plant only those desirable plant species listed on this label into soil treated the previous season with **Pendulum 1.15% Plus Fertilizer** or injury may occur.

#### **Tolerant Ornamental Species**

Pendulum 1.15% Plus Fertilizer is safe around and over the top of the established plants listed below.
