Subject: Forum Fungicide
EPA Registration No. 241-427
Your Amendment dated April 25, 2008
Decision No. 380808

Dear Dr. Birk:

The supplemental labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act as amended is acceptable provided the supplemental labeling must be incorporated into the main label within 18 months or at your next label printing, whichever comes first.

One copy of the label stamped "Accepted with comments" is enclosed for your records. Please submit one copy of the final printed label before the product is released for shipment. If you have any questions, please contact Tamue L. Gibson by phone at (703) 305-9096 or via email at gibson.tamue@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Mary L. Waller".

Directions For Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DO NOT apply this product when wind conditions favor drift.

DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

General Information

Forum® fungicide should be used in a preventive spray program to manage the target diseases. Maximum results can only be achieved by thorough plant coverage. **Forum** must be used in accordance with this label. It is recommended that this product be used within an Integrated Pest Management Program.

In order to reduce the risk of the development of fungicide resistance, **Forum** must be used as a tank mix with a fungicide that has a different mode of action (non-Group 15 fungicide) and is effective against the

pathogen of concern. Refer to the respective tank mix partner labeling for rates, methods of application, proper timing, restrictions and precautions. Always use in accordance with the more restrictive label restrictions and precautions. **DO NOT** use a pesticide product that contains a prohibition against tank mixing.

Disease pressure, plant growth rate, and environmental conditions will determine the length of the spray interval and frequency of application. Sprayers should be properly calibrated before application. Apply material with adequate spray pressure and gallonage and use proper nozzle arrangement to provide full coverage.

Forum may be applied by ground, aerial or chemigation according to label directions.

Directions For Application

Maximum benefit of **Forum** from foliar applications requires thorough coverage of the plant. To obtain thorough coverage of foliage, use proper spray pressure and a minimum of 20 gallons per acre for ground applications and 5 gallons per acre for aerial applications.

Table 1. Forum® fungicide Crop-specific Use Recommendations

Crop	Target Disease	Use Rate (ozs Product per Acre per Application)	General Recommendations	Restrictions
