A poison for preparing rat baits for control of
the Norway (Brown) Rat

D A N G E R: KEEP OUT OF REACH OF CHILDREN

POISON

ACTIVE INGREDIENTS:

Alpha-naphthylthiourea

92%

INERT INGREDIENTS*

TOTAL

8%
100%

*For USDA use only: This material is purchased from S.B. Penick
& Co. Please refer to their Form #422-4 for inert ingredients.

GENERAL DIRECTIONS: Dust powder into burrows and holes with a
standard dust pump. Spread a thin layer of dust in batches on the
floor where mice and/or rats travel. Care must be taken to insure
that this powder is used only in locations not accessible to
children, pets and domestic animals. Do not expose where powder
may contaminate food or feed. After completion of rodent control
program, collect all dead and live animals and clean up remaining powder.

ANTU is a poison to humans. It is not a cumulative poison. It is
not a carcinogen. It is not a teratogen. It is not a mutagen. It is
not a reproductive toxin. It is not a developmental toxin. It is not a
neurotoxin. It is not a hepatotoxin. It is not a nephrotoxin. It is not a
cardiotoxin. It is not a hematotoxin. It is not a immunotoxin. It is not a
endocrine disruptor. It is not a neuroendocrine disruptor. It is not a
reproductive system disruptor. It is not a developmental system disruptor.
