FLIES, MOSQUITOES, WASPS, AND FLYING MOTHS OUTDOORS. For outdoor use, it is a good idea to use the repellent from the same lot to Spray outdoor surfaces. For best results, wash down with water, or water down these insects away from people. As a general rule, it is best to spray right before going outside, and to spray again before going back inside. When the repellent is used at night or in the late afternoon, it will keep the insects away from the house at night or to congregate.
