formula 120

an industrial & household residual insecticide

ACTIVE INGREDIENTS

*O,O-diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate	500%
Pyrethrins	050%
**Technical Piperonyl Butoxide	100%
***N-Octyl Bicycloheptene Dicarboximide	166%
Aromatic Petroleum Distillate	406%
Petroleum Distillate	98 658%
INERT INGREDIENTS	120%
Total	130 000%

CAUTION: Keep out of reach of children. See side panel for additional caution instructions.

NET CONTENTS 1 GALLON LIQUID

X-it

formula 120

an industrial & household residual insecticide

CAUTION: Harmful if swallowed. Keep out of reach of children. Avoid contamination of feed and foodstuffs. Avoid inhalation. May be absorbed through skin. Avoid skin contact. Wash thoroughly after handling. Avoid contact with eyes and clothing. Do not use on household pets or humans. Do not allow children in treated areas until surfaces are dry.

Cover or remove aquaria in areas to be treated.

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams, or ponds. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME. N.Y.F.D.C of A No 2563

EPA Reg. No 255-99

DIRECTIONS FOR USE:

Use as a spot application only in places specified in these directions. Spray infested surfaces only until wet. Do not spray in the air. Do not use on plants.

Food Handling Establishments: Places other than private residences in which exposed food is held, processed, prepared or served.

Food Areas — application limited to crack and crevice treatment only. Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing) preparing edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups.) Serving areas when food is exposed and facility is in operation (also would be considered a food area)

Apply **Formula 120** in small amounts directly into cracks and crevices using equipment capable of delivering a pin stream of insecticide, where roaches, waterbugs and silverfish hide; in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases, conduits, motor housing, junction or switch boxes. Prior to application de-energize electrical equipment. After application, allow time for oil to evaporate before starting motors or placing switches in the on position.

Aids in the control of pantry pests (exposed stages of sawtooth grain beetle, flour beetle, rice weevil, cigarette beetle, drugstore beetle, and indian meal moth) which come in contact with treated surfaces.

Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS OTHER THAN AS A CRACK AND CREVICE TREATMENT ARE NOT PERMITTED.

Serving Areas — Facilities where prepared foods are served, such as dining rooms but excluding areas where foods may be prepared or held.

Apply **Formula 120** as a spot treatment to selective surfaces such as baseboards, under elements of construction, into cracks and crevices. Avoid treating surfaces likely to be contacted by food. (Do not apply when facility is in operation or foods are exposed)

Non-Food Areas — Includes garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

Apply **Formula 120** as a spot treatment to baseboard areas, around water pipes, surfaces behind and beneath sinks, lockers, tables, pallets and similar areas where insects hide or through which they may enter

Roaches, Ants, Waterbugs, Silverfish, Sowbugs, Springtails, Spiders, Firebrats, Crickets, Earwigs: Spray until wet, surfaces behind and beneath cabinets, refrigerators, sinks, stoves, ant trails and other localized areas infested with insects. Spray window sills and door frames where ants enter. Repeat as necessary

Carpet Beetles: Make localized application to areas of the floor and baseboards. Spray directly into cracks and under carpets where insects may be found. Treat crevices, cracks and infested areas of shelving in closets. Repeat as necessary

Brown Dog Ticks: Spray infested areas around baseboards, window and door frames, wall cracks, sleeping quarters of pets and localized areas of floors and floor coverings. Repeat as necessary. Bedding should be replaced in animal quarters after treatment. Do not treat animals.

Flies, Mosquitoes, Wasps and Flying Moths — OUTDOORS: For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surface of screens, doors, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures on porches, in garages and other places when these insects alight or congregate. For wasps, spray the nest after dark, when all insects have returned to the nest

Ants, Clover Mites — OUTDOORS: For treatment of localized infestations of insects in outdoor areas where there is no vegetation, spray infested areas. For ants, wet hills and runways. Repeat as necessary

Chiggers and Brown Dog Ticks — OUTDOORS: For treatment of localized infestations of insects, spray weeds and brushy noncrop areas. Repeat as necessary

Container Disposal: Do not reuse this container. Destroy by perforating or crushing. Bury or discard in a safe place, away from water supplies
