

FOR SPOT APPLICATION ONLY

DIRECTIONS

Use a canister, wet spray or a fine spray of a paint brush or similar means.

ROACHES This spray can be brushed into all infested cracks and other hiding or resting places. It is especially effective where roaches will crawl when they come out to feed. Do not spray to a limited extent. Do not spray over large areas of wall, ceiling or other room surfaces. Repeat when necessary.

SILVER FISH This spray is a fish poison and especially treat baseboards, areas behind molding, book cases and storage areas. Repeat when necessary.

ANTS Spray or brush around trails and areas around door sills and window frames. Wash floors with water in the premises. It is frequently desirable to treat the kitchen, around water pipes, heat ducts, electrical outlets and in the basement. Ants may come into rooms from wall spaces and insulation. Repeat when necessary.

BROWN DOG TICKS IN PREMISES: Externally spray or brush around baseboards, under and around trim, in animal quarters, animal quarters of household pets and in areas where ticks are known to be present. The frequency and intensity of treatment should be determined by the source and intensity of the infestation. For bedding, tick infestation in animal quarters following treatment.

CARPET BEETLES IN PREMISES: Apply to localized areas of the floor and baseboards and in mats and under carpet where beetles may be found. Infested areas of floors, baseboards and shelves of closets may also be treated. Repeated applications are necessary.

WARNING: Harmful if Swallowed! Repeated or prolonged contact with skin can cause toxic symptoms. In case of contact with skin, wash with soap and water, and foodstuffs. Do not use or store near heat or open flame. Avoid breathing spray mist. Avoid contamination of feed flame. Do not reuse empty container. Wash thoroughly with water and detergent, discard in a safe place.

This product is toxic to fish and wildlife. Do not contaminate water by cleaning of equipment, or disposal of wastes.
