(14 pt. type) CAUTION: Keep out of reach of children. Contents under pressure. See back panel for other cautions.
(10 pt. type)

Net Wt. 14 ounces

Right Panel

SHAKE GENTLY BEFORE USING

DIRECTIONS:

Remove cap. Hold container upright. Point spray opening away from you and press button. Apply sparingly in small bursts - holding can about two feet from surfaces or objects to be sprayed.

TO CONTROL GARDEN INSECTS: Spray Asters, Azaleas, Begonias, Chrysanthemums, Dahlias, Delphiniums, Gladioli, Irises, Marigolds, Petunias, Roses, Snapdragons, evergreens and small ornamental deciduous trees, shrubs and vines for the control of such insects as aphids, leafhoppers, spotted mites, thrips (exposed) and lace bugs as infestation occurs. When sprayed directly on insects will kill chewing insects such as certain caterpillars, Mexican bean beetles, climbing cutworms and Japanese beetles.

For best results spray in evening or on a cloudy day when air is still. Use slow, sweeping motion. Keep can 18 inches from plants. Avoid wetting foliage with the spray. Spray rows at the rate of 1 foot per second. For heavy growth, spray row on both sides. Repeat when needed. Spray with caution on young plants and new growth. Do not spray garden when temperature exceeds 90°F.

ACCEPTED

APR 9 1969

UNDER THE FEDERAL
INSECTICIDE AND FUNGICIDE ACT

U.S.D.A. Reg. No. _____

TO CONTROL HOUSEHOLD INSECTS

To kill flies (including DDT-resistant strains), mosquitoes, gnats, wasps, flying moths. Close all doors and windows and direct spray upward into center of room with a slow sweeping motion. Spray 5-10 seconds for average room. Keep nozzle 3 feet from surfaces. Keep room closed for 15 minutes after spraying.

To kill roaches, waterbugs, silverfish, crickets, ants, spray baseboards, cracks, crevices, moist areas, and openings around sinks and pipes and other hiding places, hitting the insects directly. Spray ant hills and ant trails over window and door sills and other locations.

For house plants, spray in short bursts, holding the can 18 inches from foliage for such plants as English Ivy and African Violets. Spray both sides of the leaves lightly. Do not wet. Repeat as often as necessary. Kills aphids (plant lice), spider mites, exposed thrips, lace bugs and certain other insects.

CAUTIONS: To avoid contamination of food and feedstuffs, do not spray directly on them, or on utensils. When used in food processing plants as a space spray, use only when plant is not in operation. Remove or cover food during treatment. Cover all working surfaces or thoroughly clean before re-use. Do not puncture can or throw into fire or incinerator. Never set container on stove, radiator or store in place where temperature exceeds 120°F. Do not spray plastics or asphalt tile. Avoid freezing.
