P.O. Box 588  
Kansas City, MO 64141-0588

Attention: Sarah G. Lowry  
Director of Manufacturing

Gentlemen:

Subject: Mintocide II  
EPA Registration No. 259-51  
Your Submission Dated July 11, 1986

The administrative amendment for the product referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that the following revisions are made before you release the product for shipment bearing the amended labeling:

1. Delete the subheading "General Classification."
2. Delete "Phenol Coefficient 8 A.O.A.C." Phenol coefficient claims are permitted only on the labels of those products when the value claimed can be considered meaningful and not misleading. Only when the phenol coefficient of a product, as claimed on the label, can be multiplied by the factor "20" to provide the effective use dilution of the product (as confirmed by the A.O.A.C. Use-Dilution Method) will the phenol coefficient claim be permitted on the label.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Jeff Kempter  
Product Manager (32)  
Disinfectants Branch  
Registration Division (TS-767C)
