

ADDITION WEEDAR SODIUM MCPA

DIRECTIONS

<u>SMALL GRAINS</u>	<u>AMOUNT PER ACRE</u>	<u>REMARKS</u>
(wheat, barley, rye, oats) <u>Not underseeded with mixed Legumes</u> Broadleaf weeds	1 to 3 pints	Treat in the spring when grain is fully tillered and 8 to 10 inches tall. Do not spray when grain is in the boot to dough stage.
Emergency treatment of perennial broadleaf weeds in wheat	6 pints	Apply 6 pints per acre when weeds are approaching bud stage, but do not spray grain in the boot to dough stage. The 6 pint (1.5 pounds acid equivalent) per acre application of any MCPA product can produce injury to wheat. Balance the severity of your weed problem against the possibility crop damage. Where perennial weeds are scattered, spot treatment is suggested to minimize the extent of crop injury.
<u>Underseeded with mixed Legumes</u> alfalfa, alsike, red and ladino clovers, trefoil	½ to 1 pint	Treat in early spring when legumes are 2 to 3 inches tall, when grain is fully tillered and 8 to 10 inches tall. Do not spray when grain is in the boot to dough stage. Use 5 to 6 gallons of water per acre since higher volumes may cause injury to legumes.
RICE	3 to 5 pints	Controls arrowhead, water plantain and red stem. Controls sedge and bulrush. For airplane applications, use 10 gallons of water per acre. For ground application use a conventional low pressure, low volume sprayer that delivers 10 to 40 gallons of water per acre. Treat 55 to 65 days after planting when rice is fully tillered and 6 to 8 inches above water. Water should be at least 2-3 inches deep. Do not spray after rice is in the boot stage, or when temperatures are over 90° F.

When diluting, the material must be mixed thoroughly before using.

EPA Reg. No. 264-55

GENERAL INFORMATION

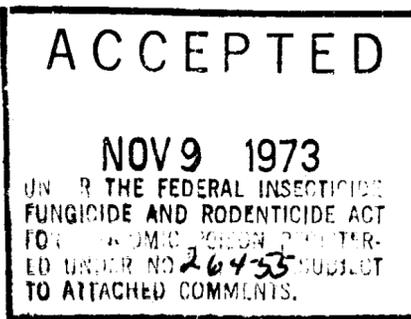

Among the weeds controlled are:

Susceptible

- lambquarters
- mustard (annual)
- ragweed
- stinkweed
- wild radish
- yellow rocket
- wintercress
- purslane
- peppergrass
- cocklebur

Moderately Resistant

- buttercup
- Canada thistle
- dandelion
- plantain
- hempenettle
- stinging nettle
- sowthistle
- vetch
- kochia
- shepherdspurse
- whiteweed (hoary cress)

CAUTION

Harmful if swallowed. Avoid contact with skin, eyes, or clothing.

Avoid spray drift to susceptible plants such as cotton, beans, peas, and ornamentals, as injury may result. (Coarse sprays are less likely to drift). Do not use same spray equipment for other purposes. Do not store near fertilizers, seeds, insecticides or fungicides.

Do not reuse empty containers. Destroy in a safe place. Do not burn.

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water used for irrigation or domestic purposes by careless cleaning of spray equipment or disposal of wastes. Do not use in a greenhouse.

Do not use this product for purposes other than those recommended on this label.

WARRANTY

Amchem warrants that composition of this product conforms to the chemical description given in the ingredient statement and the product is suited for the purposes described when used according to directions. Because of the broad range of conditions which may be encountered with the use of this product, it is impossible to eliminate all risks, even though label directions are followed. Amchem, therefore, makes no other express or implied warranty, and no agent of Amchem is authorized to do so. Buyer agrees, in purchasing this product, to assume the risks and in the event of damages arising from a breach of the warranty to accept refund of the purchase price of the product as full discharge of Amchem's liability.
