

A NON-ARSENICAL GENERAL WEED KILLER

KILLS WEEDS & GRASS on Driveways, Patios, Tennis Courts, Fence Lines, Stone Walls, Ball Diamonds

TREATS 300 SQUARE FEET

not for use on lawns

WARRANTY

The use of this material being beyond our knowledge and control, we make no warranty, express or implied, as to the effects of such use, whether or not in accordance with directions.

A method of killing weeds with the contained material is covered by U. S. Patent No. 2,670,282, owned by Amchem Products, Inc. The price at which this material was originally sold included a prepaid royalty for the right of the ultimate consumer to use the same in practicing only said patented method of killing weeds. This license applies only to the material contained herein under the present label. It does not apply to repackaged or relabeled material nor does it apply to the use of the material as a plant defoliant or plant hormone.

A non-transferable license to practice only said method of killing weeds with material from any source may be acquired from the patent owner on written request at the same royalty rate currently being charged.

U.S. Patent No. 2,891,855

Form No. 1874A-5-63-G

USDA Reg. No. 264-156

CONTAINS NO ARSENIC

To clean X-ALL LIQUID from spray equipment, flush several times with clear water after each use.

Store X-ALL LIQUID in a closed container in a dry place.

X-ALL LIQUID does not corrode spray equipment, is non-flammable, and does not stain metal, stone or concrete.

Among the weeds controlled:

Alfalfa	Pigweed
Bluegrasses	Quackgrass
Canada thistle	Ragweed
Chrysanthemum weed	Smartweed
Crabgrass	Sow thistle
Dandelion	Plantain
Foxtail	Poison Ivy
Kochia	Purslane
Lambsquarters	Velvet grass
Mustard	Wild oats
Nightshade	Witchgrass

CAUTION

Spray only the foliage you want to kill. Do not use this material to control weeds in flower or vegetable beds, field crops or in turf. Avoid spray drift. When spraying near desirable trees or shrubs, keep spray off the stems and foliage of these plants. Avoid contact with skin, eyes or clothing. Do not use same sprayer for other purposes unless thoroughly cleaned.

Printed in U.S.A.

CAUTION: Keep out of the reach of children
See other cautions elsewhere on label.

DIRECTIONS

Apply X-ALL LIQUID to small weeds in the spring or early summer, or before weeds have matured and gone to seed. It is not necessary to spray bare ground before weed growth starts in the spring.

Weeds treated after they have developed strong stems may remain standing for the rest of the season even though they are dead. These standing dead weeds are unsightly and a fire hazard. Therefore, for best results on tall weeds, cut or mow to ground line and remove. Treat one or two weeks later when regrowth appears.

In arid areas, X-ALL LIQUID should be watered into the ground if no rain falls within a week after treatment.

X-ALL LIQUID acts slowly but thoroughly. Weeds start to turn white or brown within a week and are usually dead in about three weeks. Small weeds growing actively are killed more rapidly than weeds in a dormant or dried condition.

Where Johnson grass, Bermuda grass or other weeds are not controlled by the first application, treat again with the same rate when regrowth is 6 to 12 inches tall (about 2 months).

AMOUNTS TO USE ON: Walks, driveways, terraces, parking areas of gravel, crushed rock, flagstone or similar material. Fencelines, stone walls, building foundations, other places you can't go with your mower. Tennis courts, ball diamonds, other recreation areas where bare ground is desired.

	AREA square feet	X-ALL LIQUID	Gallons Water
WEEDONE			
Plastic Sprayer	75 (7½'x10')	1 cup (8 oz.)	1
Watering can	75 (7½'x10')	1 cup (8 oz.)	1
	150 (10'x15')	1 pint (16 oz.)	2
Knapsack or tank type sprayer	75 (7½'x10')	1 cup (8 oz.)	1½
	150 (10'x15')	1 pint (16 oz.)	1
	225 (15'x15')	1½ pints (24 oz.)	1½
	300 (15'x20')	1 quart (contents this bottle)	2

MIXING SPRAYS: Fill the sprayer tank ½ to ¾ full with water. Pour in X-ALL LIQUID while stirring constantly. Fill the tank the rest of the way with water and stir again. When first added to water, this material may produce a slight curd which disappears immediately with stirring. If the spray mixture is allowed to stand several hours, stir again before spraying.
