

**DIRECTIONS**

WEEDONE GARDEN WEEDER kills weed seedlings as they sprout. It will maintain weed control for 6-8 weeks or more, depending on weather conditions.

Apply to bare soil immediately after weeding. It will not kill growing weeds. Do not disturb treated soil.

Apply directly from this shaker canister. The drawing shows the approximate number of particles desired per square inch. Contents will treat 250 square feet.

It is often desirable to stir soil in flower and shrub beds during the summer, to break up the crust that usually forms. Remove any weeds, stir the soil, then spread as recommended. A treatment at this time will prevent most weed growth for the rest of the season.

**Established Plants**

Perennial flowers      Shrubs and trees

Spread on the soil immediately after weeding and cleaning up each bed in the spring. If no rain falls within 3 to 4 days after application, water the area lightly to activate the chemical.

**Transplanted Plants**

Annual flowers      Vegetables—tomato, pepper  
Perennial flowers and shrubs

Prepare the bed and set out the transplants as usual. Allow about two weeks to overcome the "shock" of transplanting and start growing. Pull or hoe out any weeds that started to grow during this period. Spread evenly, keeping as much off the foliage as possible. Do not use on pansies.

Treat vegetables only once during the season. If necessary, flowers and shrubs may receive a second application later in the summer.

**Seeded Vegetables**

Lima Beans      Pumpkin, squash      Seedling asparagus

Prepare a good seed bed as usual, then plant the seeds. Spread the same day as planting or within a few days after planting, before weeds emerge. If no rain falls within 3 to 4 days after application, water the area lightly to activate the chemical and to insure adequate moisture for plant growth. Apply once during the season.

Do not use on seeded flowers prior to emergence, as many will be injured.

**Annual Flowers, Perennial Flowers, Shrubs & Trees**

arborvitae	dahlia	juniper	rhododendron
ash	daylily	marigold	rose
aster	dogwood	peony	snapdragon
azalea	holly	petunia	spiraea
celosia	iris	pine	spruce
chrysanthemum	ivy	privet	yew
	gladioli		zinnia

**Weeds Controlled**

foxtails	carpet weed	lambquarter
crabgrass	seedling Johnsongrass	fall panic grass
pigweed	ragweed	purslane
chickweed	smartweed	velvet leaf

Sprouts coming from roots of established perennial weeds such as horsetail, hedge bindweed, nutgrass, quackgrass, and Johnsongrass are not controlled.

**CAUTION**

Avoid contact with skin, eyes, or clothing.

Avoid unintentional mixing with fertilizer, seeds, insecticides, fungicides, or other herbicides.

Do not reuse container. Destroy when empty.

Do not use this product for purposes other than those recommended on the label.
