WEEDONE®

170

WOODY PLANT HERBICIDE

CAUTION: Keep out of reach of children.
See other cautions on right panel.

ACTIVE INGREDIENTS:

- **2,4-Dichlorophenoxyacetic acid, butoxyethanol ester 32.2%
- 2,4-Dichlorophenoxypropionic acid, butoxyethanol ester 31.6%

INERT INGREDIENTS: 36.2%

- *2,4-Dichlorophenoxypropionic acid equivalent 22.2% by weight or 2 pounds per gallon.
- **2,4-Dichlorophenoxyacetic acid equivalent 22.2% by weight or 2 pounds per gallon.

EPA Reg. No. 264-222ZA EPA Est. 264-PA-1

GENERAL INFORMATION

WEEDONE 170 is effective for controlling the following types of brush along roadsides, fencerows, vacant lots:

- ALDER
- ASPEN
- BIG LEAF MAPLE
- BIRCH
- BLACK CHERRY
- BLACKJACK OAK
- BUCKBRUSH
- BLACK LOCUST
- FIR
- HEMLOCK
- HONEYSUCKLE
- OAKS
- PINE
- POPLAR
- RED ELDER
- RED ELM
- RED MAPLE
- SALMONBERRY
- SAND SHINERY OAK
- SPRUCE
- SYCAMORE
- TULIP POPLAR
- WILLOW
- WINGED ELM
- (and many other species)

TO PREPARE A SPRAY: Add one-half the required amount of oil or water to the spray tank, then add this product with agitation and finally the balance of the water or oil with continued agitation, to prevent separation and ensure a uniform spray mixture.

CAUTION

Hazard if swallowed. Avoid contact with skin, eyes or clothing. Avoid spray drift to susceptible plants such as cotton, beans, tomatoes, tobacco and ornamentals as this product may cause injury. Coarse sprays are less likely to drift. Do not use same spray equipment for other purposes.

Under very high temperatures of use, vapors from this product may injure susceptible plants in the immediate vicinity.

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not apply when runoff is likely to occur. Do not apply when weather conditions favor drift from treated areas. Do not contaminate any body of water by washing of spray equipment or disposal of waste.

Do not store near fertilizers, seeds, insecticides or fungicides. Do not contaminate water used for irrigation or domestic purposes. Do not use in a greenhouse.

Do not reuse container. Destroy by burying in a safe place away from water supplies. Do not burn.

Do not use this product for purposes other than those recommended on this label.

WARRANTY

Amchem warrants that composition of this product conforms to the chemical description given in the ingredient statement and the product is suited for the purposes described when used according to directions. Because of the broad range of conditions which may be encountered with the use of this product, it is impossible to eliminate all risks, even though label directions are followed. Amchem, therefore, makes no other express or implied warranty, and no agent of Amchem is authorized to do so. Buyer agrees, in purchasing this product, to assume the risks and in the event of damages arising from a breach of the warranty to accept refund of the purchase price of the product as full discharge of Amchem's liability.

DIRECTIONS

FOLIAGE STEM METHOD

This is the standard method for controlling brush along fencerows, roadsides and in vacant lots. Apply spray to both foliage and stems of all plants from the time foliage is fully developed until plants begin to go dormant. For effective kill, all leaves, stems and suckers must be thoroughly wet to ground line. Some regrowth may be expected on resistant species, such as ash, maple, oak and persimmon. Mix 1/2 pint of WEEDONE 170 in 3 to 5 gallons of water. Mix thoroughly before spraying.

BASAL BARK METHOD

Thoroughly wet the base and root collar of all stems until the spray collects around the root collar at ground line. This spray may be applied in any season. Mix 1 pint of WEEDONE 170 in 3 to 4 gallons of oil. Apply with low volume knapsack sprayer.

STUMP METHOD

This method can be used at any time of year, but is more effective when applied as soon as possible after trees are cut. Spray the entire stump, particularly bark and exposed roots. Spray is most effective on stumps 3 to 4 inches across and larger. A thorough drenching is essential for complete kill. Mix 1 pint of WEEDONE 170 in 3 to 4 gallons of oil. Apply with low volume knapsack sprayer.

FRILL METHOD

Make a frill by using an axe to cut overlapping notches in a continuous ring around the trunk near its base. Cut through the bark but do not remove chips. Treat freshly cut frills at any time of the year. Mix 1 pint of WEEDONE 170 in 3 to 4 gallons of oil. Pour in as much of this mixture as the frill will hold without wasting chemical. This method is recommended for trees of 5 to 6 inches in diameter and larger.

Form No. 3092-C 5-75 TC

Printed in U.S.A.

GENERAL INFORMATION
 WEEDONE 170 is effective for controlling the following plants and weeds:

ALDER	HEMLOCK	SA. MONSIEURY
ASPEN	HONEYSUCKLE	SAND SHINNERY OAK
BIG LEAF MAPLE	OAKS	SPIRUEE
BIRCH	PINE	SYCAMORE
BLACK CHERRY	POPLAR	T. OIP POPLAR
BLACK LOCUST	RED CEDAR	WILLOW
	RED PINE	WINDU. L. M.
	RED WATTLE	Y. AND P. OY. OTHER SPECIES

TO PREPARE A SPRAY: Add 1 gallon of water to 1 quart of WEEDONE 170. When added the product will contain 2.2% active ingredient. For a 4% active ingredient solution, 10 parts of product are required for every 100 parts of water.
