MANZANITA	YERBA SANTA

(and many other species)

**TO PREPARE A SPRAY:** Add the required amount of product to the spray tank, then add this product with agitation and finally the balance of the water with continued agitation.

If this material is to be used in straight or mixture, do not let water get into it or the finished mixture.

This material forms an emulsion in water—not a solution. This tends to separate on standing. Provide agitation to prevent such separation and ensure a uniform spray mixture.

U.S. Pat. Nos. 3,488,165—3,560,193  
Canadian Patent 651,107

Printed in U.S.A.
