

# WOODY PLANT HERBICIDE

Odor inhibited.

An "invert emulsion" formulation of 2,4-D and 2,4,5-T. For controlling brush on utility rights-of-way with aerial applications.

**CAUTION:** Keep out of reach of children. See other cautions on right panel.

## ACTIVE INGREDIENTS

- \*2,4-Dichlorophenoxyacetic acid butoxyethanol ester 17.7
- \*\*2,4,5-Trichlorophenoxyacetic acid, butoxyethanol ester 17.0

## INERT INGREDIENTS

65.3

- \*4 Dichlorophenoxyacetic acid equivalent 12.2 by weight or 1 pound per gallon.
- \*\*2,4,5 Trichlorophenoxyacetic acid equivalent 12.2 by weight or 1 pound per gallon.

When using spray, mix with water in the ratio of 1 part of ENVERT DT to 100 parts of water. While agitating, add the required amount of water. Always add water to ENVERT DT, never the reverse. Mechanical agitators that operate independently of the pump should be used to provide the necessary mixing. To transfer the spray mixture from mixing tanks to aircraft, use a positive displacement pump with 1 to 2 inch diameter orifice to the suction end of the hose.

## CAUTION

This product is highly toxic to humans and animals. It is also highly toxic to fish and aquatic life. Avoid contact with skin and eyes. If contact occurs, wash immediately with water. Do not use this product for purposes other than those recommended on the label.

## WARRANTY

The manufacturer warrants that this product is free from defects in material and workmanship. It does not warrant that the product will perform under all conditions. The user assumes all liability for the use of this product.

### GENERAL INFORMATION

ENVERT DT is a highly effective disinfectant and sterilant. It is used for the disinfection and sterilization of surfaces, equipment, and instruments. It is also used for the disinfection of water.

ENVERT DT is a highly effective disinfectant and sterilant. It is used for the disinfection and sterilization of surfaces, equipment, and instruments. It is also used for the disinfection of water.

When using ENVERT DT, always add the required amount of ENVERT DT to the mixing tank. While agitating, add the required amount of water. Always add water to ENVERT DT, never the reverse. Mechanical parts, agitators, and pumps should be protected from the corrosive action of ENVERT DT. Do not use ENVERT DT in the discharge end of trucks for disinfecting water. The displacement pump with 1 to 2 inch hose fitting is used for the suction and discharge end.

ACCEPTED

## GENERAL INSTRUCTIONS

When mixed with water, ENVERT-DT makes an "invert emulsion" which is more viscous spray than ordinary water, oil or oil-in-water emulsions. This makes ENVERT-DT suitable for use in aerial spraying.

For maximum efficiency, ENVERT-DT should be applied from a helicopter.

**MIXING SPRAYS:** Use the amount of ENVERT-DT specified on the tank. While agitating, add the amount of water. Use ENVERT-DT, never use a mechanical paddle agitator. Re-circulate through the tank independently of the pump. Re-circulate through the tank until the thick emulsion is formed. Transfer the spray mixture from trucks to aircraft using displacement pumps. Use hose fittings on the discharge end.
