STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: If patient is conscious and alert, give 2-3 glasses to drink. Do not induce vomiting. Get medical attention.
IF ON SKIN: Wash skin with plenty of soap and water, if available, while removing contaminated clothing and shoes. Wash clothing separately before reuse.
IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for at least 15 minutes. Get medical attention.
IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration. Administer oxygen if necessary. Get medical attention.

NOTE TO PHYSICIAN

No specific antidote is available. All treatments should be based upon observed signs and symptoms of distress in the patient. Overexposure to materials other than this product may have occurred. This product contains petroleum distillates. If large amounts (greater than 1 ml/kg body weight) of the product have been ingested, the stomach should be evacuated by gastric intubation with the aid of a cuffed endotracheal tube to prevent aspiration of petroleum distillates. After removal of stomach contents, wash stomach by instilling 30-50 grams of activated charcoal in 3-4 ounces of water through the stomach tube and again remove stomach contents. Avoid oily laxatives.

PRECAUTIONARY STATEMENTS

CAUTION

HAZARD TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed, absorbed through skin or inhaled. Avoid breathing spray mist. Avoid contact with skin, eyes or clothing. When handling this product, wear chemical resistant gloves. Wash nondisposable gloves thoroughly with soap and water before removing. If spills occur, collect the material and dispose of by following disposal instructions on this label. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates. Drift or runoff may adversely affect fish, aquatic invertebrates and non-target plants. Do not apply directly to water or wetlands (swamps, bogs, marshes and potholes). Do not contaminate water when disposing of equipment washwaters.

Avoid spray drift to susceptible plants such as cotton, beans, tomatoes, tobacco, and ornamentals as this product may cause injury. Coarse sprays are less likely to drift. Under very high temperature of use, vapors from this product may injure susceptible plants in the immediate vicinity. Do not contaminate water used for irrigation or domestic purposes. Do not use in or near a greenhouse.

CLEANING OF EQUIPMENT: Do not use same spray equipment for other purposes unless thoroughly cleaned. When cleaning equipment, do not pour the washwater on the ground; spray or drain over a large area away from wells and other water sources.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

STORAGE AND DISPOSAL

STORAGE

Store in original container in a dry secured storage area. Keep container tightly closed when not in use.

PESTICIDE AND CONTAINER DISPOSAL

Do not reuse container. Securely wrap original container (bottle, can, jar or plastic jug) in several layers of newspaper and discard in trash.

GENERAL INFORMATION

(And many other similar species)

*Controlled by stump or basal treatment only.

FOLIAGE SPRAY

Spray WEEDONE® SUPER BK-32 Woody Plant Herbicide after brush foliage is fully developed in the spring until plants begin to go dormant in the fall. All leaves, stems and suckers should be wet thoroughly to ground line. Some regrowth may be expected on resistant species such as ash, blackberry, maple, oak and persimmon. Treat any regrowth the following season.

BASAL SPRAY

Wet the lower 18 inches of all stems until material runs down in all sides and collects around the root collar at ground line. This treatment can be applied in any season.

STUMP SPRAY

To prevent stumps from resprouting, spray the entire stump, particularly bark and exposed roots. Spray stumps any time during the year, but as soon as possible after trees are cut. A thorough drenching is essential for complete control.

CONCENTRATE STUMP TREATMENT

For small (up to 3 inch diameter) stems, cut them as close to the ground as possible and apply undiluted WEEDONE® SUPER BK-32 directly from the can to the surface of the freshly cut stump.

FRILL TREATMENT

This method is recommended for trees 5 to 6 inches in diameter and larger. Make frill by using an axe to cut overlapping notches in a continuous ring around the trunk near its base. Cut through the bark but do not remove chips. Treat freshly cut frills at any time during the year with 1 pint of WEEDONE® SUPER BK-32 Herbicide per 2 gallons of water. Pour in as much of this mixture as the frill will hold without wasting chemical.
