

#### PRECAUTIONARY STATEMENTS

#### CAUTION

HAZARD TO HUMANS AND DOMESTIC ANIMALS Harmful if swallowed. Causes eye and skin irritation. Avoid contact with eyes, skin or clothing. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly with soap and water after handling.

STATEMENT OF PRACTICAL TREATMENT In case of contact, Flush with plenty of water for at least 15 minutes. Get medical attention if irritation persists.

In case of skin contact, wash with plenty of soap and water. Get medical attention if irritation persists. Remove and wash contaminated clothing before reuse.

### (1) ENVIRONMENTAL HAZARDS

Do not contaminate water by cleaning of equipment or disposal of waste.

## STORAGE AND DISPOSAL STORAGE

Do not store near fertilizers, seeds, insecticides, or fungicides. Do not use or store near heat or open flame.

#### PESTICIDE DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

#### CONTAINER DISPOSAL

((

Do not reus empty container. Triple rinse (or equivalent). Then offer for recycling o reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If container is burned, stay out of smoke.

#### GENERAL INFORMATION

Citrus trees sprout vigorously from the root stocks and pruning cuts made on hard wood branches. Excessive sprouting on young non-bearing trees reduces maximum growth of scaffold branches while decreasing the efficiencies of maintenance sprouts by producing a dense leaf canopy.

TRE-HOLD® Sprout Inhibitor for citrus controls sprouting from pruning cuts, trunks, and root stocks. Thorough coverage immediately after pruning is necessary for maximum sprout inhibition. Do not allow TRE-HOLD® to contact buds or fo lage as injury may result. Mix thoroughly before using.

DIRECTIONS FOR USE

## IMPONTANT: IT IS % VIOLATION OF FEDERAL AND STATE LAW TO USE THIS PRODUCT IN A MAMMER INCONSISTENT WITH ITS LABELING.

Remove water sprouts or sucker growth from limbs, trunks, and root stocks. To effectively prevent resprouting from trunk or root stock, apply TRE-HOLD® Sprout Inhibitor for citrus to the entire trunk from groundline to scaffold branches. To prevent resprouting on pruning cuts on scaffold branches thoroughly cover cut surface and surrounding bark. New stock may be treated from groundline to first scaffold branches immediately after planting the grove.

GENERAL WORKER PROTECTION STATEMENTS

Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area treated must be vacated by unprotected persons.

Do not enter treated areas without protective clothing until sprays have dried.

Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult your State Department of Agriculture for further information.

Written or oral warnings must be given to workers who are expected to be in treated area or in an area about to be treated with this product. Advise workers to stay out of fields during application and until sprays have dried. Regular long-sleeved work clothing should be worn when working in treated fields. See Precautionary Statements, Statement Of Practical Treatment and Note To Physician for information on accidental exposures. When oral warnings are given, warnings shall be given in a language customarily understood by workers. Oral warnings must be given if there is reason to believe that written warnings cannot be understood by workers. Written warnings must include the following information: Appropriate signal word (CAUTION), area treated with TRE-HOLD® Sprout Inhibitor for Citrus, date of application, appropriate clothing and reentry interval (i.e., until sprays have dried).
