DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

Select cuttings (slips) from vigorous healthy plants. For most house plants, use tips 2 inches to 6 inches long from stems that break easily. For most shrubs, summer cuttings of half-ripened wood root best.

Remove any leaves or flowers at the base of the cutting. Dip the base into ROOTONE® about 1/4 inch deeper than it will be set in the rooting medium. Tap off any excess powder and insert cutting in a hole in the rooting medium with at least one node covered. Make holes wide enough so that no ROOTONE® is scraped off during planting. Firm medium around cutting to avoid air pockets.

Shade to keep the cuttings and rooting medium moderately moist until they are rooted. This is 3 to 5 weeks or longer, depending on plant species.

LIMITED WARRANTY AND DISCLAIMER

NOTICE: Buyer shall be solely responsible for any and all injury, loss, or damage which results from the use of this product in any manner which is inconsistent with the label directions, warnings, or cautions.

In case of emergency, telephone collect (24 hours a day) in the U.S.A. 1-800-334-7577.
