### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this label and the product package label before using this product. This Supplemental Label must be in possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the registered product label for Movento®.

### BRASSICA (COLE) LEAFY VEGETABLES

PESTS CONTROLLED	Rate fluid ounces/Acre	Rate lb ai/A
Aphids Swede midge Whiteflies	4.0 - 5.0	0.06 - 0.08
PESTS SUPPRESSED		
Diamondback moth Onion thrips		

### Notes and Restrictions

Pre-Harvest Interval (PHI): **1 day.**

Minimum interval between applications: **7 days.**

Maximum MOVENTO allowed per crop season: **10 fluid ounces/Acre (0.16 lb ai/A).**

Certain nonionic and organosilicone adjuvants which may potentially be used with MOVENTO have caused intolerable damage to bok choy, napa, mustard spinach, mizuna, and mustard greens when applied alone, in the absence of MOVENTO. Testing has shown that MOVENTO does not increase the potential for damage when used in combination with such adjuvants. Due to the wide variety and composition of spray adjuvants that may be used in combination with MOVENTO, only use a spreading-penetrating adjuvant that is known to be safe to the target crop.
