

DIRECTIONS FOR USE

CY-BAN should be diluted with an equal amount of water. Do not spray directly on animals. Use wetting spray pattern rather than in a fine mist.

DAIRY & BEEF CATTLE

For fly control of stable flies, horn flies, ticks, and to kill ticks contacted by the spray, dilute one pint of CY-BAN with 6 to 12 gallons of water and spray animals thoroughly to cover all parts of the animal, using two to four quarts of finished solution per adult animal and proportionately less for younger animals. Repeat as necessary to maintain control, but not more often than once weekly.

Treatment of premises such as barn walls, eaves, fences, and other areas harboring flies, with the dilute spray will aid in reducing the population in the area.

Note: Do not treat calves under 6 months of age. Branna cattle should not be treated as they may show a type sensitive reaction to organic phosphates.

SHEEP, GOATS & HOGS

To control ticks and lice on sheep and goats and lice on hogs, dilute one pint of CY-BAN with 6 to 12 gallons of water, and spray animals thoroughly to cover all parts of the animal. For the 6 gallon dilution, do not use more than 1 quart diluted spray per animal. For the 12 gallon dilution, do not use more than 1 gallon diluted spray per animal. Repeat application as needed, but not more often than once weekly.

DILUTIONS for CY-BAN are given in a range from 1 pt. CY-BAN with 6 gal. of water, 1 to 48, up to 1 pt. to 12 gal., 1 to 96. Use the lower dilution rate for 15 days or more to obtain results. Use the higher dilution rate, 1 to 96, for fly control only.

For Use In "CATTLE OILERS" (back-rubbers or face-rubbers)

For use in "CATTLE OILERS" (back-rubbers or face-rubbers) dilute one pint of CY-BAN with 6 to 12 gallons of water. The finished solution should be applied to the animal's back or face.

PRECAUTIONS IN USING

Humans: KEEP PRODUCT AWAY FROM HEAT AND OPEN FLAMES!

WARNING! HAZARDOUS IF SWALLOWED, INHALED, OR ABSORBED THROUGH SKIN. DO NOT BREATHE SPRAY. DO NOT GET IN EYES OR ON SKIN OR CLOTHING.

Wash thoroughly with soap and water after handling and before eating or smoking. Wear clean clothing. In case of spillage on person or clothing, immediately remove clothing and flush skin or eyes with plenty of water; for eyes, get medical attention.

ANTIDOTE: Extensive first aid should be given on per-
sonal contact. Immediately remove clothing and flush skin with plenty of water. For eyes, flush with water until a physician is available. For ingestion, get medical attention. For inhalation, get medical attention. For absorption through skin, get medical attention. For absorption through skin, get medical attention.

Livestock: DO NOT CONTAMINATE FEED OR FOODSTUFFS.
