Horse Lice Duster

Indications: For control of biting lice, sucking lice, and fleas on horses and ponies. Also for control of fleas on dogs and cats.

Directions: Remove cap from duster. Then just squeeze to apply. Dust directly onto all parts of the animal's body. Then brush powder deep into hair with a stiff brush. Brush against the grain of hair to bring dust in contact with skin. For best results give special attention to the neck, mane, tail, flanks, and wherever hair is long. Repeat application after two to three weeks, if necessary. Apply this same powder to animal quarters and bedding to prevent reinfestation.

Cautions: Harmful if swallowed. Keep out of reach of children. Do not inhale dust. Avoid contact with eyes. Do not use on horses intended for slaughter.

Active Ingredients: R rotenone 1.00%, Other Cube Resins 1.66%, Pyrethrins .025%, Piperonyl Butoxide Technical 0.25% (Equivalent to .20% (butylcarbityl) (6-propylpiperonyl) ether and .05% related compounds)

Inert Ingredients: 97.065%

USDA Reg. No. 270-50
