

DIRECTIONS

Shake well before use. Turn cap on. Mix a small amount of diluted spray from your bottle in a bucket. If necessary, spray by pressing the plunger down and drawing the material into the tube from which it is dispensed.

TO CONTROL SUMMER SORES: spray from a bucket evenly directly into and around any infected wound when the drainage area below the wound has welled up to the level of the spray. Repeat applications at 7 day intervals until wound is healed.

TO CONTROL SCREW WORMS: spray from a bucket away directly into and around any infected wound as the drainage area below the wound wells up. Repeat applications at 7 day intervals until wound is healed.

TO CONTROL FLEECE WORMS: and other summer sores, spray directly into the wound directly into the infected wound. Also treat around the wound, including the drainage area. Repeat applications at 7 day intervals until wound is healed.

TO PROTECT WOUNDS & NAVELS OF NEWBORNS: against screw worm infestation, spray directly into the wound. Repeat applications at 7 day intervals until wound is healed.

TO CONTROL EAR-TICK: spray directly into the ear with the tip of the nozzle. Repeat applications at 7 day intervals until the ear is clear of ticks. Repeat applications at 7 day intervals until the ear is clear of ticks.

CAUTION: Injurious to eyes. Do not get in the eye. If contact with human eyes, flush eyes immediately with plenty of water and get prompt medical attention. Avoid breathing spray mist. Wash hands thoroughly after using. Avoid contact with animals and foodstuffs. Do not use with water.

WARNING: Content under pressure. Do not use near fire or heat. Do not use in confined spaces. Do not use in areas where it may cause damage to property.

Keep out of reach of children. Do not use in areas where it may cause damage to property. Do not use in areas where it may cause damage to property.
