BACK LABEL

LABEL 1

SUPER-SHEEN WIPE PLUS Fly Protectant is a specially formulated wipe-on repellent containing absorbable lanolin developed for use on show and pleasure horses where appearance is highly important. When used as directed, Super-Sheen Wipe Plus will provide hours of effective protection against insects as well as impart and maintain a bright, healthy sheen to the hair.

CAUTION

Harmful if swallowed. If swallowed call a physician. Do not induce vomiting. Avoid contact with eyes, mucous membranes and skin. Avoid contamination of food. Avoid using excessive amounts of Super-Sheen WIPE Plus on your animal. Do not wet the hide. Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies. Wash hands after using. Do not use, pour, spill, or store near heat or open flame.

DIRECTIONS FOR USE

SHAKE WELL BEFORE USING

Before application, brush animal to remove loose dust, dirt and debris. Moisten (don't soak) a folded piece of Turkish toweling (approximately 12" x 15") with SUPER-SHEEN WIPE PLUS. Rub briskly against the growth of hair, giving special attention to shanks, legs, shoulders, neck and facial area of

horse. Add more SUPER-SHEEN WIPE PLUS to toweling as needed to apply approximately two ounces daily, depending on size of animal. Then groom with a brush.

- * To make sure the proper amount of SUPER-SHEEN WIPE PLUS is transferred to the animal, we recommend that the cloth used to apply the repellent be kept in an airtight container (such as a tin can) between periods of daily use. This will ensure its moistness at the start of daily application.
- * Repeated daily applications of SUPER-SHEEN WIPE PLUS may build up repellency on the animal. Thus its effectiveness may be increased, and gradually enable you to reduce the amount applied.
- * Best application time is between 8 and 10 a.m. This gives you the best protection for the maximum period of time.
- * Amount of repellent required to do an effective job will vary according to season, temperature, climate, humidity and cleanliness of animal.
- * Use only Turkish toweling (not a substitute material) to apply SUPER-SHEEN WIPE PLUS.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Avoid contact with eyes, mucous membranes and skin. Avoid contamination of food. Avoid excessive amounts of Super-Sheen Wipe Plus on your horses. Do not wet the hide.

STATEMENTS OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting. Drink large quantities of water. Do not give anything by mouth to an unconscious person. Call a physician or Poison Control Center.

IF IN EYES: Flush with water for 15 minutes. Seek medical attention if irritation persists.

IF ON SKIN: Wash with soap and water. Wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is highly toxic to fish. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Drift from treated areas may be hazardous to organisms in adjacent aquatic sites. Do not contaminate water when disposing of equipment washwater.

DIRECTIONS FOR USE

SHAKE WELL BEFORE USING

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Before application, brush animal to remove loose dust, dirt and debris. Moisten (don't soak) a folded piece of Turkish toweling (approximately 12" x 15") with SUPER-SHEEN WIPE PLUS. Rub briskly against the growth of hair, giving special attention to shanks, legs, shoulders, neck and facial area of horse. Add more SUPER-SHEEN WIPE PLUS to toweling as needed to apply approximately two ounces daily, depending on size of animal. Then groom with a brush.

- * To make sure the proper amount of SUPER-SHEEN WIPE PLUS is transferred to the animal, we recommend that the cloth used to apply the repellent be kept in an airtight container (such as a tin can) between periods of daily use. This will ensure its moistness at the start of daily application.
- * Repeated daily applications of SUPER-SHEEN WIPE PLUS may build up repellency on the animal. Thus its effectiveness may be increased, and gradually enable you to reduce the amount applied.
