Wipe V Fly Protectant is specially formulated for use on valued race horses and fine show horses, but will prove of equal value to pleasure riders seeking effective fly protection for their animals. Actually helps in the removal of dirt and dandruff. Imparts a high sheen to the hair when brushed out.

### DIRECTIONS FOR USE: SHAKE WELL BEFORE USING

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Before applying Wipe V to your horse, brush him down thoroughly to remove loose dust and dirt. Moisten (but do not soak) a folded piece of Turkish toweling (approximately 12" x 15") or an Applicator Mitt with Wipe V. Wear rubber gloves during application. Rub briskly against the growth direction of the hair. Give special attention to the shanks, legs, shoulders, neck and facial areas of the horse where flies tend to cause the greatest problems. Add more Wipe V to the applicator as needed, applying approximately one to two ounces for the total application on a daily basis (the variance will depend on the size of the horse. Do not exceed 2 ounces per animal). Avoid using excessive amounts. Do not soak the skin. Groom with a brush.

### A FEW IMPORTANT POINTS TO REMEMBER:

- In order to keep the applicator moist, insure proper coverage of Wipe V. It is recommended that the cloth used to wipe the applicator be changed between uses.
- Regular daily applications of Wipe V may build up repellency. Because of this, its effectiveness may be increased over time due to the amount of Wipe V applied on a daily basis.
- To produce maximum effectiveness, the best time for application is early morning.
- Climatic conditions such as temperature and humidity can affect the speed of evaporation of the active ingredients. In hot, dry weather, the active ingredients may evaporate more quickly than in cooler, more humid conditions.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS CAUTION

For animal use only. Do not use on humans. Keep out of reach of children. Harmful if swallowed. May be absorbed through the skin. Wash hands thoroughly after use. Do not use on or around food. Do not use on or around food. Avoid contact with eyes. If contact occurs, flush with water.

### STATEMENT OF PRACTICAL TREATMENT

If swallowed: Call a physician immediately. Gastric lavage is indicated if material was taken orally. DO NOT INDUCE VOMITING. If necessary, treatment is indicated in severe cases. If swallowed, give one or two glasses of water. If in eyes, flush with water. If in mouth, rinse with water. Do not induce vomiting. If in mouth, rinse with water.

If inhaled: Remove person to fresh air. Apply artificial respiration if needed. Wash exposed skin with soap and water. If in eyes, flush with water. If in mouth, rinse with water.

### ENVIRONMENTAL HAZARDS

Do not release into the environment. Do not use in or near water bodies. Do not use in or near water bodies.
