HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

Harmful if swallowed. Avoid contact with eyes. In case of eye contact, flush with plenty of water. Consult a physician if irritation persists (humans). Avoid contamination of foodstuffs or utensils. For animals, discontinue use if irritation develops.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Hold pet securely. Cleanse ear thoroughly. Fill outer ear canal half full with Mite-X. Massage base of the ear to distribute solution into ear wax. Repeat every other day until condition is relieved. Symptoms should improve in 4 to 6 days. Continue treatment for 12 days. Since ear mites occasionally are found on other parts of the body, reinfestation may occur unless a suitable dip or other full-body treatment is used. Do not use on dogs, cats, or rabbits under 12 weeks. Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or medicated animals.

INDICATIONS: Ear mites normally cause a dry, dark brown waxy exudate with crusts in the ears of dogs and cats. Mites are easily observed by placing some of the ear wax on a dark surface and watching closely for moving white specks. Do not injure the delicate tissue of the ear. Inflamed, watery or blocked ear canals indicate a more serious condition which requires special treatment. Sensitivities may occur after using ANY pesticide product for pets. If signs occur, please consult a veterinarian immediately.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Keep away from heat.

CONTAINER DISPOSAL: Do not reuse empty container; wrap and put in trash collection.
