## CONTROL HOUSEFLIES WITHOUT HAZARDOUS CHEMICALS OR INSECTICIDES

Fly Stop may be used with complete confidence around children, pets, food, or in "sick rooms" because there is no exposure to insecticide vapors. No more spraying the air you breathe with poisons. No mess. No fuss. No cleaning up dead flies. Just hang in a light area and forget it. Once flies or other small flying insects contact the amazingly sticky surface they are trapped -- once they land they can never leave!

Years of research have gone into the development of the patented design and color of our exclusive "Fly-Glo" paper. When placed in a light area the visual attraction of this paper is more effective than a 25 watt electronic bug killer.

### PRECAUTIONARY STATEMENTS

#### ENVIRONMENTAL HAZARDS

#### CAUTION

This product is capable of trapping small flying animals such as bats or hummingbirds that may accidentally fly into it.

Do not hang in location where birds, bats, pets or children may accidentally come in contact with glue.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Choose an area near a window or electric light source. The more light the area receives the more effective the visual attraction.
2. Open end of box marked "Open this end" and remove foil pouch; carefully remove Fly Stop from box -- remember it is VERY sticky. Cut or tear off one corner of pouch and sprinkle contents of pouch evenly over the sticky surface of Fly Stop. Pull out hook and hang from ceiling or exposed rafters high enough to be out of reach of children or pets, in an area where people will not accidentally come into contact with the sticky surface.
3. Replace Fly stop when 80% or more of the exposed surface is covered with trapped insects. Avoid contact with trapped insects.

LABEL BACK

INSTRUCTIONS FOR REMOVAL OF GLUE: If trap is accidentally contacted and glue gets on skin or clothing, remove with waterless hand cleaner, then wash area with mild soap and water. If in hair or animal fur, use baby oil or mineral oil. Massage area with GENEROUS amount of oil, then wash with warm water and bland soap or shampoo. Rinse well. This treatment may have to be repeated several times to assure complete removal.
