- 3. Dietary Exposure Branch recommends the registration of your product since it is unlikely that tolerances for piperonyl butoxide and diazinon in the meat, meat by products, and fat would be exceeded.
- 4. The Precautionary Review Section has found several of your acute toxicity studies to be unacceptable (see enclosed reviews). In lieu of requiring you to preform additional studies, we have decided that the Diazinon MG8 toxicity profile may be extrapolated to your product. Therefore the requirement for acute toxicity studies is waived and the subject product will be assigned the following toxicity categories:

TEST	CATEGORY
ORAL TOXICITY	111
DERMAL TOXICITY	III
INHALATION TOXICITY	III
EYE IRRITATION	III
DERMAL IRRITATION	III
DERMAL SENSITIZATION	NOT A SENSITIZER

5. Submit five copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

CONTENTS:

APR 21 500

Under the Foderal Insecticide, Sungicide, and Redenticide Act to smeaded, for the pesticide Stored under EPA Reg. No.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

CAUTION: Harmful if absorbed through the skin or if swallowed. Avoid contact with skin and eyes. Wash thoroughly with soap and water after handling and before eating or smoking. Avoid contamination of feed and foodstuffs. If rubbed in eyes, flush with plenty of water. If swallowed or if eye irritation persists, call a Physician. Wear clean gloves daily when applying tags.

NOTE TO PHYSICIAN: This product is a cholinesterase inhibitor. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to water. Do not contaminate water by disposal of used tags.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of pesticide application.

For optimum pest control and to minimize development of insect resistance, apply two tags per animal (one in each ear) in May to June or when flies first become a problem in the spring. Replace as necessary. FARNAM TURBO has been proven effective against pyrethroid resistant Horn Flies for a minimum of 4 months. Remove tags in the fall. Tags are easily applied and designed for use with the unique ApolloTM Pinless Applicator.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool location away from direct sunlight. Opened pouches containing ear tags should be resealed for storage.

PESTICIDE DISPOSAL: Remove tags before slaughter. Securely wrap used tags in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

NOTICE OF WARRANTY

Farnam Companies, Inc. makes no warranty of Merchantability, Fitness for any particular purpose, or otherwise expressed or implied concerning this product or its uses which extend beyond the use of the product under normal conditions in accord with the statements made on this label.
