Vectobac-SG is a highly selective insecticide for use against mosquito larvae.

#### APPLICATION DIRECTIONS

##### MOSQUITOES

##### Habitat

##### Suggested Rate Range\*

Irrigation ditches, road-side ditches, flood water, standing ponds. 2-10 lb/acre

Catch basins, storm water retention areas, tidal water, salt marshes and rice fields. 2-10 lb/acre

Polluted water, sewage lagoons, etc. 10-20 lb/acre

\*Use higher rate when late 3rd and 4th instar larvae predominate, mosquito populations are high, water is heavily polluted, and/or algae are abundant.

Apply uniformly by conventional aerial or ground equipment.

A 7 to 14 day interval between applications should be employed. Where non-target aquatic invertebrate parasites and predators are present, longer periods of suppression may result, since these beneficials would be conserved to aid in mosquito population management.

#### PRECAUTIONARY STATEMENTS **MAY 2** ENVIRONMENTAL HAZARDS

Do not contaminate water by cleaning of equipment or disposal of wastes. Under the Fungicide, and as amended, registered under
