

DIRECTIONS

TO CLEAN AND DISINFECT TOILETS

For cleaning and disinfecting toilets, remove water from the bowl by forcing it over the trap with a swab mop. Remove ~~excess~~ water from the swab by pressing against side of bowl. Hold bottle over bowl and saturate swab with bowl cleaner. Clean bowl by swabbing thoroughly, especially under the rim where the water outlets are located. Flush toilet several times and rinse applicator thoroughly.

TO CLEAN AND DEODORIZE URINALS

Hold bottle over urinal and saturate the swab thoroughly with bowl cleaner. Clean the urinal by wetting the entire surface with the swab. Pay particular attention to the grooves along the sides and the water outlets at the top. After the surface is clean remove screen at the bottom of the urinal and pour two to four ounces of bowl cleaner on the edge and into the drain for deodorization. Allow to stand two to three minutes. Swab the inside pipe. Replace screen and flush well.

NOTE - IMPORTANT

Use only on vitreous toilets and urinals. Do not use on sinks, bathtubs, wash basins or other porcelain enameled surface. If Bowl Cleaner is used on any surface other than vitreous ware it is done entirely at the user's risk.

DANGER-CORROSIVE

KEEP OUT OF REACH OF CHILDREN

May be fatal if swallowed. Do not breathe vapor or fumes. Produces chemical burns. Do not get in eyes, on skin or on clothing. Do not mix with bleach or other chemicals.

ANTIDOTE EXTERNAL

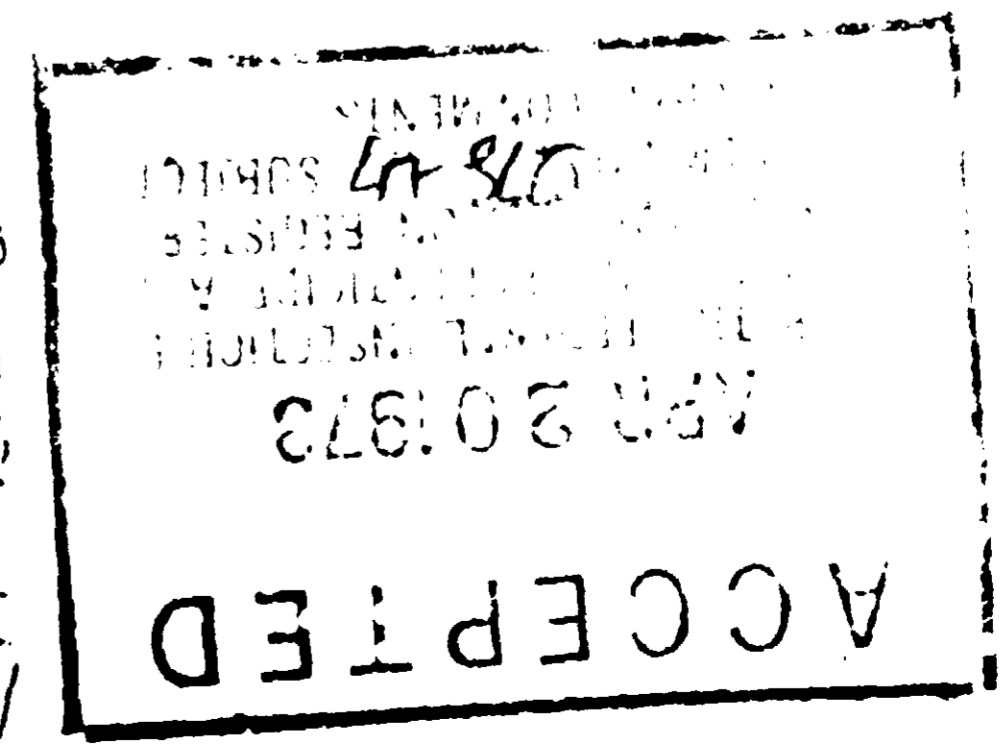

Eyes — Wash with water for 15 minutes. Get prompt medical attention.

Skin — Wipe off the acid gently, immediately flood the surface with water, using soap freely, then cover with moist magnesia or baking soda.

ANTIDOTE INTERNAL

Call a physician immediately. Drink a teaspoon or more of magnesia, chalk, or small pieces of soap, softened with water in milk or raw egg white.

Rinse empty container thoroughly with water and discard it.
