ACCEPTED

PRECAUTIONARY STATEMENTS Hazards to Humans (& Domestic Animals)

Danger

Chlorpyrifos is highly toxic to humans and domestic animals. It is a potent inhibitor of cholinesterase activity.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in eye irritation, redness, and other symptoms.

Environmental Hazards

Chlorpyrifos is highly toxic to aquatic life. It is a potent inhibitor of cholinesterase activity.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in eye irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in eye irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in eye irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in eye irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in eye irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in eye irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in eye irritation, redness, and other symptoms.

Exposure to chlorpyrifos may result in dizziness, headache, nausea, vomiting, diarrhea, and other symptoms.

Exposure to chlorpyrifos may result in respiratory distress, difficulty breathing, and other symptoms.

Exposure to chlorpyrifos may result in skin irritation, redness, and other symptoms.
