the 1990s, the number of people in the United States who are 65 years of age or older has increased by 50% (U.S. Census Bureau, 1997). The number of people aged 65 and older is projected to increase to 20% of the total population by the year 2020 (U.S. Census Bureau, 1997). The increase in the number of people aged 65 and older is expected to be even more dramatic in other countries. For example, the number of people aged 65 and older in Japan is projected to increase from 15% of the total population in 1990 to 25% of the total population by the year 2020 (U.S. Census Bureau, 1997). The increase in the number of people aged 65 and older is expected to be even more dramatic in other countries. This product contains Bentazone Sulfur.

Bentonite sulfur is made by the absorption of fused sulfur into bentonite in the proportions of thirty part sulfur and seventy parts bentonite. A portion of the sulfur particles are very minute, some of them colloidal. The process of manufacture and the character of the sulfur particles impart to the product distinctive properties with respect to toxicity, to certain degree of persistence on plants, suspension in an aqueous solution, and safety to host plants.

WARNING – POISON

The package contains ARSENIC or combinations thereof for agricultural purposes only. Must not be kept or used in a room where food is being manufactured or prepared or where powdered food is stored.
