CITRUS SOLUBLE OIL - LIGHT MEDIUM

28 Gallons

Special attention has been given in the formulation of Citrus Soluble Oil to make it compatible with wettable powder materials such as Phoskil 25 Spray, Malathion 25 Spray, and products used for the correction of minor element deficiencies.

MIXING DIRECTIONS

Before using this product, be sure the spray tank is clean and contains just enough water to cover the agitator shaft. With agitator running, start filling tank with water; add oil when tank is about half full. Pump this mixture through the overflow and back into the tank for about two minutes to insure proper emulsification. Fill with water, adding other desired materials as tank is filling. Keep agitator running at all times. Sufficient agitation must be present to insure proper emulsification. If an injector is used, first add 25 to 50 gallons of water to tank with engine running to provide good pressure. Put injector suction tube into the measured amount of spray oil, opening injector valve to allow the oil to be sucked into the tank, then fill the tank with water.

DO NOT USE THIS MATERIAL IF IT DOES NOT EMULSIFY.
