DANGER - POISON
KEEP OUT OF REACH OF CHILDREN

ANTIDOTE: If swallowed. Give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Have victim lie down and keep quiet. Call a Physician immediately.

If on skin. In case of contact, remove contaminated clothing and immediately wash skin with soap and water.

Parathion is a cholinesterase inhibitor and treatment of severe poisoning should include the use of Atropine.

ATROPINE IS ANTIDOTAL

Keep on hand an emergency supply of 20 tablets, grains 1/100. In case of poisoning take 3 tablets (grs. 1/100) and call physician at once.

Physician: Enough atropine must be given in the shortest practical time to produce dilation of pupils. Patient must be under constant supervision and additional atropine may be necessary without delay. Clear chest by postural drainage. Use artificial respiration and oxygen if patient becomes comatose. Use of airway may be necessary.
