FIRST AID

If swallowed: Give activated charcoal if available and a glass of water. Repeat until vomiting occurs and contents are clear. Never induce vomiting or give anything by mouth to an unconscious person. Call a physician immediately. If breathing has stopped, start artificial respiration and call a physician immediately.

If In Eyes: Flush eyes for 15 minutes with plenty of water. Call a physician immediately.

If On Skin or Clothing: Remove clothing immediately. Drench skin or eyes with water for at least 15 minutes. Wash clothing before reuse. Thoroughly wash all contaminated skin with soap and water. Call a physician immediately. Wash all contaminated clothing and shoes before reuse.

ANTIDOTE

Note to Physician: Active ingredient is an organic thiophosphate inhibitor. Patient should be kept under observation for at least 48 hours. Atropine is antidote. Give 1 to 2 mg. atropine sulfate intravenously. Repeat every 5 minutes until full atropinization. Do not use morphine.
