LANSTAN[®] 20 GRANULAR

SOIL FUNGICIDE

E.P.A. REGISTRATION NO. 279-2181 AA

| | |
|-------------------------------|----------------|
| ACTIVE INGREDIENT: | BY WT. |
| 1-chloro-2-nitropropane | 20.00% |
| INERT INGREDIENTS: | 80.00% |
| | <u>100.00%</u> |

DIRECTIONS FOR USE

LANSTAN 20 GRANULAR is a soil fungicide for use in the control of certain cotton seedling diseases relating to Thielaviopsis, Pythium and Rhizoctonia species of soil fungi.

NOTICE: This treatment is not intended as a substitute for regular fungicide seed treatment. The in-furrow treatment should be used in conjunction with a recommended seed treatment, good seedbed preparation, proper irrigation and cultivation and insect control.

DIRECTIONS FOR USE

COTTON (California): Apply 7½ to 10 pounds per 13,000 linear feet of row on a 40 inch row spacing. Apply in the furrow during the planting operation. Application units should be arranged so as to place the granules at the bottom of the seed furrow. Immediate sealing through the use of a packing wheel is desirable. Do not allow food animals to eat foliage or vines in or from treated fields.

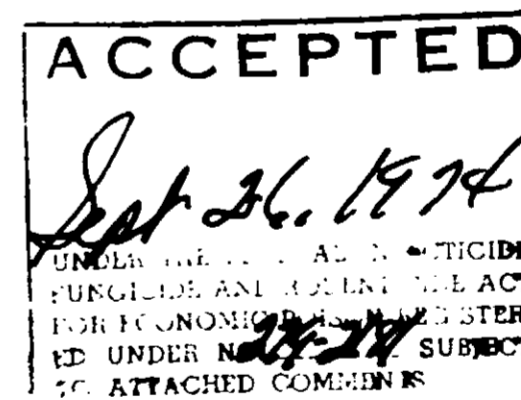

May Be Fatal If Swallowed, Inhaled or Absorbed Through Skin. Wear protective clothing, rubber gloves and goggles during handling and application. Wear a mask or respirator containing a carbon type cartridge. Replace cartridge daily. DO NOT GET IN EYES. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention. Do not get on skin. In case of contact, wash immediately with soap and water.

WARNING

KEEP OUT OF REACH OF CHILDREN

DISPOSAL CAUTION

DISPOSE OF WASTES by burying in non-crop lands away from water supplies. Bags should be buried with wastes or burned. Keep out of smoke.
